My book details the living hell that was my experience with concussions. The majority of this story was kept from even my closest relationships. It wasn't easy, but it's time to tell it. Dale Jr. It was a seemingly minor crash at Michigan International Speedway in June 2016 that ended the day early for Dale Earnhardt Jr. What he didn't know was that it would

also end his driving for the year. He'd dealt with concussions before, but concussions are like snowflakes—no two are the same. And recovery can be brutal—and lengthy. As a third-generation driver in a family forever connected to the sport of stock-car racing, how could Dale Earnhardt Jr. sit on the sidelines and watch everyone else take their laps? It was one of the toughest seasons of his life—one that changed him forever. In this gripping narrative from one of professional sports' most beloved figures, Dale Jr. shares stories from his journey: how his career and his injury have transformed him, how he made the decision to retire at the end of the 2017 season after eighteen years behind the wheel, and what lies ahead for him in the next chapter of his life. There's no second-guessing

and no regrets from Driver #88. He simply wants to go out on his own terms and make the rest of his life off the racetrack count. Junior says, "I don't want these last races to be just about me but rather the people who made my success possible: my fans, the folks who pack the grandstands rain or shine, my teammates and crew members through the years, industry colleagues, track volunteers, friends, family, sponsors. They've all played a role. I couldn't have done it without them."

TRB has released the final version of TRB Special Report 308: The Safety Promise and Challenge of Automotive Electronics: Insights from Unintended Acceleration, which examines how the National Highway Traffic Safety Administration (NHTSA) regulatory, research, and defect investigation programs can be strengthened to meet the safety assurance and oversight challenges arising from the expanding functionality and use of automotive electronics. The report gives particular attention to the NHTSA response to

consumer complaints of vehicles accelerating unintentionally and to concerns that faulty electronic systems may have been to blame. The committee that produced the report found that the increasingly capable and complex electronics systems being added to automobiles present many opportunities for making driving safer but also present new demands for ensuring their safe performance. These safety assurance demands pertain both to the automotive industry development and deployment of electronics systems and to the safety oversight role of NHTSA. With regard to the latter, the committee recommends that NHTSA give explicit consideration to the oversight challenges arising from automotive electronics and that the agency develop and articulate a long term

Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an
