If there's too much motor oil in the crankcase, the oil pump and crankshaft tend to aerate it and whip it into a froth. It practically turns all the moving parts in the engine into one big oil pump, while the intake for the oil pump itself will be picking up a lot of air along with the oil. Remember that at highway speed, the crankshaft and ...

I have a problem with my 2000 Polaris 425 Expedition. It will start, run, and sputter then die. Giving it gas does nothing. It is then hard to restart. The battery is fully charged, it gets spark, and used to run great. It seems that the quad is starving for fuel. I read that there is a fuel pump that goes bad.

Polaris Xpedition 425 2000, Oil Filter by Emgo®. Company is here with excellent products that are available at a competitive price. The company does its utmost to provide the best possible solutions for your needs.

Until 1973 few people, either in the advanced, industrial countries or in the developing countries of the Third World, thought seriously on the issues and complexities involved in the production and marketing of the oil on which they relied. It was only with the sudden steep increases in oil prices that the oil industry became a matter of general discussion, and the Organisation of Petroleum Exporting Countries (OPEC) became a front page topic for analysis and comment. However, real understanding of the organisation and its policies did not accompany this rush of interest and much confusion has followed. In particular, the Arab exporters have received the weight of the criticism although they have only a share in the market and not a monopoly. This book attempts to instil a greater mutual understanding between oil exporters and importers, although it is not a wholesale endorsement of Arab policies, by outlining the major policy areas in this field. It looks at new policy options and their implications in exploration, marketing and pricing and at downstream operations such as the petrochemical and gas industries. In conclusion, this study identifies the wide-ranging opportunities that the new oil policies have opened up for the Arab countries, in the national, regional and international context, and assesses and clarifies the responsibilities which accompany this success. First published in 1983.

1897/98, [v.2], "Appendix to the Report of the chief of the Bureau of navigation" contains correspondence and documents relating to the conduct of the war with Spain, collected, arranged and edited by Ensign H. H. Ward, under the direction of the bureau
