In Right to be Hostile, scholar and activist Erica Meiners offers concrete examples and new insights into the "school to prison" pipeline phenomenon, showing how disciplinary regulations, pedagogy, pop culture and more not only implicitly advance, but actually normalize an expectation of incarceration for urban youth. Analyzed through a framework of an expanding incarceration nation, Meiners demonstrates how educational practices that disproportionately target youth of color become linked directly to practices of racial profiling that are endemic in state structures. As early as preschool, such educational policies and practices disqualify increasing numbers of students of color as they are funneled through schools as under-educated, unemployable, 'dangerous,' and in need of surveillance and containment. By linking schools to prisons, Meiners asks researchers, activists, and educators to consider not just how our schools’ physical structures resemble prisons— metal detectors or school uniforms— but the tentacles in policies, practices and informal knowledge that support, naturalize, and extend, relationships between incarceration and schools. Understanding how and why prison expansion is possible necessitates connecting schools to prisons and the criminal justice system, and redefining "what counts" as educational policy.

How migrants became the scapegoats of contemporary mainstream politics From the 1960s the UK’s immigration policy--introduced by both Labour and Tory governments--has been a toxic combination of racism and xenophobia. Maya Goodfellow tracks this history through to the present day, looking at both legislation and rhetoric, to show that distinct forms of racism and dehumanisation have produced a confused and draconian immigration system. She examines the arguments made against immigration in order to dismantle and challenge them. Through interviews with people trying to navigate the system, legal experts, politicians and campaigners, Goodfellow shows the devastating human costs of anti-immigration politics and argues for an alternative. The new edition includes an additional chapter, which explores the impacts of the 2019 election and the ongoing immigration enforcement during the coronavirus pandemic. Longlisted for the 2019 Jhalak Prize
