Develop the skills you need in the real

world Hit the ground running with the street-smart training you'll find in this practical book. Using a "year in the life" approach, it gives you an inside look at the common responsibilities of security administrators, with key information organized around the actual day-to-day tasks, scenarios, and challenges you'll face in the field. This valuable training tool is loaded with hands-on, step-by-step exercises covering all phases of a security administrator's job, including: Designing a secure network environment Creating and implementing standard security policies and practices Identifying insecure systems in current environment Providing training to on-site and remote users An invaluable study tool This no-nonsense book also covers the common tasks that

CompTIA expects all of its Security+ candidates to know how to perform. So whether you're preparing for certification or seeking practical skills to break into the field, you'll find the instruction you need, including: Performing an initial risk assessment Installing, updating, and running anti-virus Encrypting files and securing e-mail Creating new user accounts Deploying IPSec The Street Smarts series is designed to help current or aspiring IT professionals put their certification to work for them. Full of practical, real world scenarios, each book features actual tasks from the field and then offers step-by-step exercises that teach the skills necessary to complete those tasks. And because the exercises are based upon exam objectives from leading technology certifications, each Street

Smarts book can be used as a lab manual for certification prep.

The perfect workbook for project managers and PMP exam candidates seeking practical experience New project managers and students pursuing the Project Management Professional certification are looking for practical experience to solidify their skills. The step-by-step tasks presented in this book offer them an opportunity to practice the common tasks project managers face in the real world. The authors, both expert project management trainers and consultants, explore each phase of project management: initiation, planning, execution, monitoring and control, and closing the project, with in-depth instructions for handling the tasks associated with each phase. New

project managers and exam And candidates need practical experience to perfect their skills; this book helps them learn through real-world scenarios Explores each phase of project management, offering step-by-step instructions to many of the tasks project managers confront each day Covers all phases of project management, including initiating the project, planning, executing, monitoring, controlling, and closing the project Looks at defining scope, developing a project charter, creating a plan to manage change, breaking down the work, managing resource allocation, measuring performance, and releasing resources Fully updated to cover everything required for the 2011 PMP exam PMP exam candidates and anyone new to project management will benefit from the

hands-on exercises in this book.

Make the most of your time—and your leadership Is your school's vision getting buried under paperwork? If you spend more time picking up pieces than putting them together, this is your book. Written by seasoned school principals, this plan of action will get you back to the essence of your job: instructional leadership. By using educational technology to maximize efficiency, you'll improve teaching, student achievement, resource management, and school culture. This comprehensive guide features: Easy-to-follow, single-topic chapters Standards-based scenarios and questions Time-management self-assessments Easily adaptable experiential exercises Strategies for battling the "silent time thief"

Who benefits from smart technology? Whose interests are served when we trade our personal data for convenience and connectivity? Smart technology is everywhere: smart umbrellas that light up when rain is in the forecast; smart cars that relieve drivers of the drudgery of driving; smart toothbrushes that send your dental hygiene details to the cloud. Nothing is safe from smartification. In Too Smart, Jathan Sadowski looks at the proliferation of smart stuff in our lives and asks whether the tradeoff—exchanging our personal data for convenience and connectivity—is worth it. Who benefits from smart technology? Sadowski explains how data, once the purview of researchers and policy wonks, has become a form of capital. Smart technology, he

argues, is driven by the dual imperatives of digital capitalism: extracting data from, and expanding control over, everything and everybody. He looks at three domains colonized by smart technologies' collection and control systems: the smart self, the smart home, and the smart city. The smart self involves more than self-tracking of steps walked and calories burned; it raises questions about what others do with our data and how they direct our behavior—whether or not we want them to. The smart home collects data about our habits that offer business a window into our domestic spaces. And the smart city, where these systems have space to grow, offers military-grade surveillance capabilities to local authorities. Technology gets smart from our data. We may enjoy the

conveniences we get in return (the refrigerator says we're out of milk!), but, Sadowski argues, smart technology advances the interests of corporate technocratic power—and will continue to do so unless we demand oversight and ownership of our data.

Develop the skills you need in the real world Hit the ground running with the street-smart training you'll find in this practical book. Using a "year in the life" approach, it gives you an inside look at network administration, with key information organized around the actual day-to-day tasks, scenarios, and challenges you'll face in the field. This valuable training tool is loaded with hands-on, step-by-step exercises covering all phases of network administration, including: Designing a network Implementing and configuring
