ACOG Pap Smear Guidelines-Abnormal Pap Smear- Womens ...

Cervical cancer screening is used to find changes in the cells of the cervix that could lead to cancer. The cervix is the opening to the uterus and is located at the top of the vagina. Screening includes cervical cytology (also called the Pap test or Pap smear) and, for some women, testing for human papillomavirus (HPV).

American Cancer Society's new cervical cancer screening ...

The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation. For women age 21 to 29, only "cytology testing," which looks for abnormal or unhealthy cells under a microscope, should be used.
