VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobooks Owners Workshop Manual Series back into print. The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.

The Autodelta story, Alfa Romeo's more or less official racing department between 1963 and 1983. A tale of unforgettable victories, of two titles conquered in the World Championship for Marques, but also one of scalding defeats. Great names in the history of motorsport raced in the colours of the team born in the province of Udine and nurtured at Settimo Milanese including Ignazio Giunti, Nino Vaccarella, Andrea de Adamich and Toine Hezemans. All drivers who competed - under the aegis of the incomparable Carlo Chiti - at the wheel of unforgettable cars such as the Giulia TZ, the GTA, the 33 in its various guises, the Alfetta GT rally cars and naturally the less successful Formula 1 machines. All this is revived in a book constructed around painstaking research and illustrated with hundreds of photographs, many of which previously unpublished

Since the beginning of archery as a sport in America, archers have looked to easily obtained, quality wooden dowels as a source for arrow shafts. Times have changed, and while the quality of dowels has gone down, their use by beginning and do-it-yourself archers has never been higher. The Dowel Arrow Handbook is for those who wish to make their own arrows for target archery and hunting, while showing how to build arrows that are not only accurate, but safe to use.

primary cause of cardiac disease and its progression, therapy continues to focus on end-organ protection and does not approach the neural core of the problem. Growing public health problems such as heart failure are still treated with autonomic drugs that are 30-40 years old and simply act on cardiac receptors. However, it has now been shown that the progression of ischemic heart disease to heart failure is mainly due to abnormal central responses to incipient cardiac disease, with neural activation the primary cause rather than the consequence of cardiac remodeling. Written by leading international experts in their respective research areas, the book presents a variety of perspectives on the core topic: from social and philosophical to gender-related aspects. It is designed for a broad readership and includes dedicated sections for cardiologists, psychiatrists, neurologists and psychotherapists looking for a more insightful and targeted approach to neuro-cardiovascular disease.

Originally published under the title, *The Book of the Villiers Engine*, by C. Grange. This re-print of the 1956 tenth edition has been updated with the inclusion of the 1959 supplement from the eleventh edition, the remainder of the engine type information being identical in all respects in both editions.
