the awesome, it has the power to change everything. Are you ready for 365 Days of Awesome?

This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

The latest update to Bela Liptak's acclaimed "bible" of instrument engineering is now available. Retaining the format that made the previous editions bestsellers in their own right, the fourth edition of Process Control and Optimization continues the tradition of providing quick and easy access to highly practical information. The authors are practicing engineers, not theoretical people from academia, and their from-the-trenches advice has been repeatedly tested in real-life applications. Expanded coverage includes descriptions of overseas manufacturer's products and concepts, model-based optimization in control theory, new major inventions and innovations in control valves, and a full chapter devoted to safety. With more than 2000 graphs, figures, and tables, this all-inclusive encyclopedic volume replaces an entire library with one authoritative reference. The fourth edition brings the content of the previous editions completely up to date, incorporates the developments of the last decade, and broadens the horizons of the work from an American to a global perspective. Béla G. Lipták speaks on Post-Oil

Energy Technology on the AT&T Tech Channel.

Seven key principles from Finland for building a culture of trust in schools around the world. In the spring of 2018, thousands of teachers across the United States—in states like Oklahoma, Kentucky, and Arizona—walked off their jobs while calling for higher wages and better working conditions. Ultimately, these American educators trumpeted a simple request: treat us like professionals. Teachers in many other countries feel the same way as their US counterparts. *In Teachers We Trust* presents a compelling vision, offering practical ideas for educators and school leaders wishing to develop teacher-powered education systems. It reveals why teachers in Finland hold high status, and shows what the country's trust-based school system looks like in action. Pasi Sahlberg and Timothy D. Walker suggest seven key principles for building a culture of trust in schools, from offering clinical training for future teachers to encouraging student agency to fostering a collaborative professionalism among educators. *In Teachers We Trust* is essential reading for all teachers, administrators, and parents who entrust their children to American schools.

Kidnapped into slavery in 1841, Northup spent 12 years in captivity. This autobiographical memoir represents an exceptionally detailed and accurate description of slave life and plantation society. 7 illustrations. Index.

The Great Acting Teachers and Their Methods, Volume 2 features the innovative ideas and theories of: ζ André Antoine ζ Jacques Copeau ζ Michel Saint-Denis ζ Elia Kazan ζ Uta Hagen ζ David Mamet ζ Anne Bogart ζ Keith Johnstone

**BOOK SYNOPSIS** In this follow-up to his first volume that has become an essential classroom text, Brestoff examines all new teachers and exposes the origin of today's ideas and exercises that acting students are practicing. What is the rationale behind the lesson? Why is it useful? Whether they can be called revolutionary or evolutionary, the conflicting theories of these teachers result from outrage and disgust. Andre Antoine, Jacques Copeau and Michel Saint-Denis represent a virtually unacknowledged yet powerful French influence on acting and actor training in the United States and abroad. American Realist teachers known as the passionate questioners, such as Elia Kazan, who is disgusted with Broadway's commercialism, Uta Hagen and David Mamet, and two influential ζoutside-the-boxζ teachers, Anne Bogart with her Viewpoints work and Keith Johnstone, creator of Theatre Sports, are also featured. While differences among the various acting theories and practices are noted and analyzed, so too are exciting and unexpected connections among them revealed.

**RICHARD BRESTOFF** is Associate Professor of Drama and Associate Head of Acting University of California, Irvine. He is the author of four best-selling books for Smith and Kraus, including The Great Acting Teachers and Their Methods, The Camera Smart Actor, The Actor's Wheel of Connection and Acting Under the Circumstances. He has acted on Broadway and off, in Regional Theater and on camera, appearing on the 1991 Emmy Ballot for his Guest-Star performance on the CBS television series, thirtysomething. Richard holds an MFA in Acting from NYU where his teachers included
