When a body was discovered by two German hikers walking in the Alps in 1991, little did they realise it had been there for over 5000 years! Who was Ötzi the Ice Man, as he has become known? What did scientists find out by examining his remains? And what further finds from the ancient past might our changing climate reveal? Help Key Stage 3 students move from Level 3a to Level 4c in reading. Support comprehension with the amazing photographs from the South Tyrol Museum of Archaeology. Encourage shared and guided reading using the ready-made tasks and discussion points on the activity pages at the back of the book

Now in its fourth hardcover printing, Define "Normal" has become a word-of-mouth phenomenon. This is a thoughtful, wry story about two girls--a "punk" and a "priss"--who find themselves facing each other in a peer-counseling program, and discover that they have some surprising things in common. A brand-new reading-group guide written by the author is included in the back of this paperback edition.

Shakir tells the long neglected story of the bint arab--the Arab woman--in the United States. Weaving together a survey from the late 19th century to the

present, she focuses on each generation's negotiation between traditional Arab values and the social and sexual liberties permitted women in the West. Interspersing oral histories, Shakir challenges stereotypes and creates a unique and fascinating portrait of an often misunderstood group.

INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." — Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

Test Prep Genius' development team has over 40 years of academic experience with the SAT, PSAT, ACT, AP Subjects, and other college entrance exams. Nick has a three-legged dog named Lucky, some pet fish, and two moms who think he's the greatest kid ever. And he happens to think he has the greatest Moms ever, but everything changes when his birth mom and her wife, Jo, start to have marital problems. Suddenly, Nick is in the middle, and instead of having two Moms to turn to for advice, he has no one. Nick's emotional struggle to redefine his relationships with his parents will remind readers that a family's love can survive even the most difficult times.

Seventeen-year-old Alyssa thought she knew who she was. She had her family and her best friends and, most important, she had Sarah. Sarah, her

girlfriend, with whom she dreamed with about the day they could move far away and live out and proud and accepted for themselves, instead of having to hide their relationship. Alyssa never thought she would have to make that move by herself, but disowned by her father and cut off from everyone she loves, she is forced to move hundreds of miles away to live with Carly, the biological mother she barely knows, in a town where everyone immediately dismisses her as "Carly's girl." As Alyssa struggles to forget her past and come to terms with her future, will she be able to build a new life for herself and believe in love again? Or will she be forced to relive the mistakes that have cost her everything and everyone she cared about? National Book Award finalist Julie Anne Peters has written a compelling novel about coming out, finding love, and discovering your place in the world. Alyssa's story will speak to anyone who has known the joy and pain of first love and the struggle to start over again.

In this fresh, poignant novel (originally published under the title *Far From Xanadu*), Mike is struggling to come to terms with her father's suicide and her mother's detachment from the family. Mike (real name: Mary Elizabeth) is gay and likes to pump iron, play softball, and fix plumbing. When a glamorous new girl, Xanadu, arrives in Mike's small Kansas town, Mike falls in love at first sight. Xanadu is everything Mike is not -- cool, confident, feminine, sexy.... straight. Julie Anne Peters has written a heartbreaking yet ultimately hopeful novel that will speak to anyone who has ever fallen in love with someone who can't love them back.

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. *Capitalism without Capital* concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.
