**Catalog Reference - Aeroval, Inc.**  
Generating function (Generator mode) In Generator mode, the Starter Generator Units are regulated converters providing regulated 28 VDC for on-board DC networks from 6000 rpm to 13000rpm, with nominal ratings between 200 and 400 A Regulated converters are used to create high quality DC networks.

**Starter Generator | Meggit Power & Sensing**  
The terminal voltage was 28V DC and the starter generator types tested were APC 150 SG and APC 200 SGL. The motor controller of the invention may be fabricated by using discrete components, functional, integrated circuits and discrete components as a hybrid circuit, and also by LSI (Large Scale Integration) as a monolithic block.
