Special illustrations: The eighth edition includes many new illustrations and brain scans, particularly in the later chapters, to stimulate student interest and clarify important points. The illustrations in Biopsychology were designed by Pinel and his artist/designer wife, Maggie; thus they are the perfect complement to Pinel's written words.

Pinel, Biopsychology: Pearson New International Edition ...

Introduction to Biopsychology, 9/e, introduces the study of the biology of behaviour; that is, the neural mechanisms of psychological processes in the central nervous system.

Pinel, Introduction to Biopsychology, Global Edition, 9th ...

Biopsychology clearly presents the fundamentals of the study of the biology of behavior and makes the topics personally and socially relevant to the student. The defining feature of Biopsychology is its unique combination of biopsychological science and personal, reader-oriented discourse. It is a textbook that is "untextbooklike."

Pinel, Biopsychology: International Edition, 7th Edition ...

Pinel's Biopsychology is the core text for my first year as an e-learning psychology student. The text is very easy to follow and is written a less formal manner than some text books, which I find a welcome change. The many diagrams and theme tabs are extremely useful, especially on the neuroanatomy module.

Pinel encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to the reader. For undergraduate junior/senior level courses in Behavioral Neuroscience, Physiology of Behavior, Biopsychology, Human Neuropsychology, or Physiological Psychology. Biopsychology is an introduction to the study of the biology of behavior; it focuses on the neural mechanisms of psychological processes. The defining feature of Biopsychology is its unique combination of cutting-edge biopsychological science and student-oriented discourse. Rather than covering topics in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, personal implications, social issues, helpful metaphors, and memorable anecdotes.

For courses in Physiological Psychology and Biopsychology Explore how the central nervous system governs behavior Biopsychology presents a clear, engaging introduction to biopsychological theory and research through a unique combination of biopsychological science and personal, reader-oriented discourse. Original author John Pinel and new co-author Steven Barnes address students directly and interweave the fundamentals of the field with clinical case studies, useful metaphors, and memorable anecdotes that make course material personally and socially relevant to readers. In addition to expanded learning objectives that guide students through the course, the Tenth Edition has been thoroughly updated to reflect this rapidly progressing scientific field. MyLab(tm) Psychology not included. Students, if MyLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyLab Psychology is an online homework, tutorial, and assessment product designed to personalize learning and improve results. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts.

Where To Download Biopsychology International Edition Pinel

For courses in Physiological Psychology and Biopsychology. A student-focused approach to how the central nervous system governs behaviour Biopsychology, 11th Edition presents a clear, engaging introduction to the discipline through a unique combination of biopsychological science and personal, reader-oriented discourse. Addressing students directly, authors John Pinel and Steven Barnes interweave the fundamentals of the field with clinical case studies, social issues, personal implications, useful metaphors, and memorable anecdotes. The 11th Edition incorporates two new emerging themes ("thinking about epigenetics" and "consciousness") and includes up-to-date coverage of recent developments in the field.

Pinel's textbook presents the fundamentals of the study of the biology of behaviour and makes the topics personally and socially relevant to the student. A key feature of 'Biopsychology' is its combination of biopsychological science and personal, reader-oriented discourse.

Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience -- for less than the cost of a traditional textbook. NOTE: Revel is a fully digital delivery of Pearson content. This ISBN is for the standalone Revel access card. In addition to this access card, you will need a course invite link, provided by your instructor, to register for and use Revel.

Were you looking for the book with access to MyPsychLab? This product is the book alone, and does NOT come with access to MyPsychLab. Buy Introduction to Biopsychology with MyPsychLab access card 9e (ISBN 9781292059297) if you need access to the MyLab as well, and save money on this brilliant resource. Delves into how the central nervous system governs behaviour Introduction to Biopsychology, 9/e, introduces the study of the biology of behaviour; that is, the neural mechanisms of psychological processes in the central nervous system. This program combines biopsychological science and student-oriented discussion, interweaving the basics of this specialized field with clinical case studies and exploring the personal and social implications that arise. The author encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to readers.

This custom edition is specifically published for the University of Queensland.

Dr. James W. Kalat's BIOLOGICAL PSYCHOLOGY is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions, Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

For today's busy student, we've created a new line of highly portable books at affordable prices. Each title in the Books a la Carte Plus program features the exact same content from our traditional textbook in a convenient notebook-ready, loose-leaf version - allowing students to take only what they need to class. As an added bonus, each Books a la Carte Plus edition is accompanied by an access code to all of the resources found in one of our best-selling multimedia products. Best of all? Our Books a la Carte Plus titles cost less than a used textbook! "Basics of Biopsychology" clearly presents the fundamentals of the study of the biology of behavior and makes the topics personally and socially relevant to the student. By emphasizing four interwoven themes ("Thinking Clearly," "Clinical Implications," "The Evolutionary Perspective," and "Cognitive Neuroscience") throughout the book, the major recent developments in the rapidly changing field of biopsychology come alive clearly and completely for students. How Biopsychologists Think about Behavior, Anatomy of the Brain, Neural Activity and How to Study It, The Visual System, Mechanisms of Perception, The Sensorimotor System, Development of the Nervous System, Brain Damage and Neuroplasticity, Learning, Memory, and Amnesia, Hunger, Eating, and Health, Hormones and Sex, Sleep, Dreaming, and Circadian Rhythms, Health Psychology, Lateralization, Language, and the Split Brain, and Behavioral Neuroscience of Psychiatric Disorders " "biopsychology"
