What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.

visualizes Information and Communication Technology mining the rural talent. Here, Dr. Kalam presents his dream of schools in India at 2020 as symbiotic nerve centres connecting teachers, students and community; personifying knowledge that exists in the world. He also makes a clarion call to accelerate the process of societal transformation. This would involve raising the standards of governance and safeguarding the sanctity of public institutions. The book uses the metaphor of a tree to describe the process of knowledge bearing fruits of prosperity in the contemporary globalized world where different phases, formative, adult working life, and post-50 experienced senior citizens, call for different kinds of learning. The book refers to a contextual contribution of a large number of Indian scientists and artists and proves that there

What makes a nation great? Is it simply economic prosperity and military strength -- or something more? What is it that we as a nation require to make that last-mile journey to what all the plans, investments and projects are meant to lead up to? It is only a matter of time before India is termed economically developed. But a nation has to learn to survive in tough times too. And for that what is most important is national character, born out of the value systems that exist in our families, what schools teach students, and the culture of the nation. In *Pathways to Greatness*, A.P.J. Abdul Kalam shifts focus from the economic development of India by 2020 to the development of our strengths, offering key lessons that will
