We see teaching mathematics as a form of story-telling, both when we present in a classroom and when we write materials for exploration and learning. The goal is to explain to you in a captivating manner, at the right pace, and in as clear a way as possible, how mathematics works and what it can do for you. We find mathematics to be intriguing and immensely beautiful. We want you to feel that way, too.

This new text presents calculus with solid mathematical precision but with an everyday sensibility that puts the main concepts in clear terms. It is rigorous without being inaccessible and clear without being too informal—it has the perfect balance for instructors and their students. “We (my AP Calculus students and I) are enjoying Rogawski's text—very much, in fact. I've asked my students to do a "compare and contrast" with the Rogawski text versus our "regular" textbook, and each time, the students were unanimous in their positive attitudes towards Rogawski's material.” – Glen Vest, Ritenour High School (MO)
