Tools for filtering the World Wide Web exist, but they are hampered by the difficulty of capturing user preferences in such a dynamic environment. We explore the acquisition of user profiles by unobtrusive monitoring of browsing behaviour and application of supervised machine-learning techniques coupled with an ontological representation to extract user preferences.

Capturing knowledge of user preferences | Proceedings of ...

Capturing user preferences is a problematic task. Simply asking the users what they want is too intrusive and prone to error, yet monitoring behaviour unobtrusively and then finding meaningful patterns is difficult and computationally time consuming. Capturing accurate user preferences is however, an essential task if the information

Capturing knowledge of user preferences with recommender ...

Capturing accurate user preferences is, however, an essential task if the information systems of tomorrow are to respond dynamically to the changing needs of their users. This thesis tests the hypothesis that using an ontology to represent user profiles offers advantages over traditional profile representations in the context of recommender systems.

CiteSeerX | Capturing Knowledge of User Preferences ...

Capturing accurate user preferences is, however, an essential task if the information systems of tomorrow are to respond dynamically to the changing needs of their users. This thesis tests the hypothesis that using an ontology to represent user profiles offers advantages over traditional profile representations in the context of recommender systems. A novel ontology-based approach to recommendation is applied to a real world problem and empirically evaluated.

Capturing knowledge of user preferences with recommender ...

measure of the importance of location in capturing users' privacy preferences. A single location rule is defined by a latitude-longitude (lat-lon) rectangle and a set of people or groups who can view the user's location within the rectangle.

Capturing Location-Privacy Preferences: Quantifying ...

Folow these steps to capture User Settings for Google Chrome. User Settings template for Google Chrome. A basic User Settings template for Google Chrome is available: On the tab Capturing, click add, select Templates > Internet Browsers > Google Chrome to use it. Capturing will be done on the following folder tree: %LOCALAPPDATA%\Google\Chrome\User Data.

HOWTO: Capture Google Chrome settings in a managed session

KTUP endows the preferences with explicit semantics with relation types in KG, capturing the intuition that the type of item attributes plays a crucial role in user decision-making process. Technically speaking, we transfer the relation embeddings as well as entity embeddings learned from KG to TUP, simultaneously training the KG completion and recommendation tasks.
