Even today case histories are one of the main methods of investigation in abnormal psychology and psychiatry. This makes it clear that the case study is a method that should only be used by a psychologist, therapist or psychiatrist, i.e. someone with a professional qualification. There is an ethical issue of competence.

Case Study Method in Psychology | Simply Psychology

Case studies are almost always engrossing to me. This is a great book concerning the conceptualization, treatment, and etiology of a variety of disorders. Bonus: There are (up to) 15 year follow-ups for some of the subjects. This edition would be a superb addition to an abnormal psych course.
