David Cayley's Ivan Illich in Conversation, based on the CBC interviews, provides perhaps the best single overview of Illich's life and work.) To truly grasp Illich's arguments, I have found, is to find oneself moved and even pained. It is to feel, to truly feel in one's gut, a tension between great power and immense powerlessness.

~~THE CHALLENGES OF IVAN ILLICH—Monoskop~~

'Challenges' is a great collection by some of Ivan's friends. Some of the articles are a bit intellectually weighty but there are a few really accessible chapters that newcomers will understand. As John W. Verity suggested - try and read Ivan's earlier stuff - its very readable and VERY relevant right now.

The Challenges of Ivan Illich, a collection of personal reflections by friends and colleagues of this writer, teacher, radical thinker and controversial Roman Catholic priest, was published shortly before his death in December 2002.

~~A Turbulent Priest in the Global Village—LewRockwell~~

Ivan Dominic Illich was a Roman Catholic priest, theologian, philosopher, and social critic. His 1971 book *Deschooling Society* criticises modern society's institutional approach to education, an approach that allegedly constrains learning to narrow situations in a fairly short period of the human lifespan. His 1975 book *Medical Nemesis*, importing to the sociology of medicine the concept of medical harm, alleges that industrialised society widely impairs quality of life by overmedicalising life,

~~Ivan Illich—Wikipedia~~

Illich focuses on both the terrible injustice to deny the individual his or her talents, and at the same time brings our attention to the great social loss by denying society the benefit of the genuine talents and skills.

~~Philosophy of Education—Ivan Illich—Deschooling ...~~

Deschooling Society is a 1971 book written by Austrian author Ivan Illich that critiques the role and practice of education in the modern world. It can be credited with bringing Illich to the forefront of his field.

Original essays explore the thought and influence of philosopher, educator, social critic, and theologian Ivan Illich.

Dying Is Not Death examines from a traditional humanistic position the act of dying. The author views death as a universal experience that can and perhaps should force us to explore various technological intrusions upon it. Each chapter is an independent narrative, and some chapters tell stories of those struggling to die when confronted with the medical system's technological artifacts. Recounting different persons' experiences of death, Lee Hoinacki suggests that the medical system's conventional approaches to dying and death can distort our preparation for this most important experience. Borrowing from Jacques Ellul and Ivan Illich, Hoinacki acknowledges technology as an all-embracing system with powerful symbolic effects on the human condition and argues to a conflict between faith and technology. Indeed, with Ellul, he holds that in order to criticize technology, one must find some "place" outside the technological milieu that would act as a kind of Archimedean lever. One must somehow get to the Beyond to judge where one stands in the world.

For more than fifteen years, iconoclastic thinker Ivan Illich refused to be interviewed. Finally, in 1988, CBC's David Cayley persuaded Illich to record a conversation. This first interview led to additional sessions that continued until 1992 and are now gathered in *Ivan Illich in Conversation*. In these fascinating conversations, which range over a wide selection of the celebrated thinker's published work and public career, Illich's brilliant mind alights on topics of great contemporary interest, including education, history, language, politics, and the church.

"Each of the four essays printed here was written for a specific occasion and together comprise only the smallest selection from a larger corpus questioning commodity and energy-intensive economies. The essays are presented thematically instead of chronologically to offer a better view of the sweep of Illich's argument. In the first two, "War against Subsistence" and "Shadow Work," Illich reveals both the ruins on which the economy is built and the blindness of economics which cannot but fail to see it. The second two essays, "Energy and Equity" and "The Social Construction of Energy," unearth the nineteenth century invention and subsequent consequences of 'energy' thought of as the unseen cause of all 'work' whether done by steam engines, humans, or trees. The science of ecology relies on this assumption and, as Illich explained, unwittingly fuels the addiction to energy. The close dance of energy consumption and economic growth is characteristic of not just industrially geared societies. After all, energy consumption steadily increases even in so-called post-industrial societies, fueling the fortunes of Google and Apple no less than Wal-Mart"--

Taking its theme from the fifth annual Studying Leadership conference held at Cranfield School of Management, this work offers new formulations of the concept of leadership. Making a clear link between research and practice, it explores how new ideas about leadership will lead to new approaches to leadership practice.

As Europe moves toward 1992 and full economic unity, and as Eastern Europe tries to find its way in the new economic order, the United States hesitates. Will the new European economic order be good for the U.S. or not? Such a question is exacerbated by world-wide changes in the technological order, most evident in Japan's new techno-economic power. As might be expected, philosophers have been slow to come to grips with such issues, and lack of interest is compounded by different philosophical styles in different parts of the world. What this volume addresses is more a matter of conflicting styles than a substantive confrontation with the real-world issues. But there is some attempt to be concrete. The symposium on Ivan Illich - with contributions from philosophers and social critics at the Pennsylvania State University, where Illich has taught for several years - may suggest the old cliché of Old World vs. New World. Illich's fulminations against technology are often dismissed by Americans as old-world-style prophecy, while Illich seems largely unknown in his native Europe. But Albert Borgmann, born in Germany though now settled in the U.S., shows that this old dichotomy is difficult to maintain in our technological world. Borgmann's focus is on urgent technological problems that have become almost painfully evident in both Europe and America.

This wide-reaching handbook offers a new perspective on the sociology of health, illness and medicine by stressing the importance of social theory. Examining a range of classic and contemporary female and male theorists from across the globe, it explores various issues including chronic illness, counselling and the rising problems of obesity.

"John Ohliger made you angry, made you think, made you laugh, made you want to sing, made you read literature late into the night and poetry when you might have been working. His remarkable story is of the making of the most influential adult education intellectual in the United States of the twentieth century working outside the university. Grace and Rocco deliver the goods on this complex and challenging activist adult educator."? —Budd Hall, director, Office of Community-Based Research, University of Victoria? "I met John Ohliger just once. He was a crusty, challenging, eccentric, wonderful man. This is a remarkable book about that wonderful man, in which you can hear Ohliger's own voice and then read a whole crowd of leading thinkers in the field of adult education reflecting on his legacy. You do not get this kind of quality thinking between two covers too often." —Michael Newman, author, *Teaching Defiance?* "John Ohliger was a quite unique adult educator and he made his impression on American adult education. Educators should know his work and this book provides an excellent introduction to it. The authors are to be commended for making it known to a new generation." —Peter Jarvis, editor, *International Journal of Lifelong Education?*
