The Chart interfaces provide clients with the means to dynamically describe and populate a Chart when the diagram is viewed. The API is wide ranging and flexible, allowing you to illustrate many different scenarios graphically at runtime. The feature allows you to define any type of chart you require using JavaScript either as code or JSON. A good reference for the Chart interfaces and their use is the 'EA 15 Examples > Dynamic Charts' Package in the Enterprise Architect Example Model.

Dynamic Charts - Enterprise Architect User Guide

There are pre-set charts that can simply be dragged onto a diagram, and user defined charts where you can define the chart type, the content and the chart appearance. This expressive and flexible feature provides an invaluable tool for the Project Manager and, apart from day-to-day tracking, provides useful collateral for inclusion into executive presentations.

The updated 11th edition of the Aeronautical Chart User's Guide by the FAA is a great reference for novice pilots and professionals alike. Printed in full color with detailed examples, this book provides all the information students and pilots need to know about all the symbols and information provided on US aeronautical charts and chart navigation publications. Readers will find information on VFR charts, aeronautical chart symbols, helicopter route charts, flyway planning charts, IFR enroute charts, explanation of IFR enroute terms and symbols, Terminal Procedure Publications (TPPs), explanation of TPP terms and symbols, airspace classifications, and an airspace class table.

Go beyond the standard chart legends and learn the meaning behind all of the symbols found on aeronautical charts. The FAA publishes aeronautical charts for each stage of VFR (visual flight rules) and IFR (instrument flight rules) flight including training, planning, departure, enroute (low and high altitude), approach, and taxiing. This guide is an excellent reference book for novice and experienced pilots alike, as well as for international pilots as a means of becoming familiar with U.S. charts. The updated 14th Edition of the Aeronautical Chart User's Guide by the FAA Aeronautical Information Service is the definitive learning aid, reference document, and introduction to the weath of information provided on aeronautical charts and in chart navigation publications. This FAA publication includes explanations of all symbology used on the FAA charts including the world aeronautical charts, sectional aeronautical, terminal area, flyway planning, helicopter route, enroute low- and high-altitude, area, and oceanic route charts, as well as standard terminal arrival routes, standard instrument departures, and instrument approach procedures. The chart legends and airspace classifications tables are included. Illustrated throughout with full-color graphics.

This is the definitive FAA reference source for understanding and interpretation of all aviation charts. The Federal Aviation Administration (FAA) publishes aeronautical charts for each stage of aircraft flight, including training, planning, departure, enroute (low and high altitude), approach, and taxiing. This guide is an excellent reference for novice and experienced pilots alike, as well as for international pilots becoming familiar with U.S. charts. This 13th Edition of the Aeronautical Chart User's Guide is the definitive learning aid, reference document, and introduction to the wealth of information provided on FAA charts and in chart navigation publications. Explains all the symbology for FAA sectional, world, terminal area, flyway planning, helicopter route, enroute low- and high-altitude, and oceanic route charts, as well as standard terminal arrival routes, standard instrument departures, and instrument approach procedures. Also includes chart legends, airspace classification tables, and is illustrated throughout with full-color graphics.

This is the definitive FAA reference source for understanding and interpretation of all aviation charts. "The Chart User's Guide is intended to serve as a learning aid, reference document, and an introduction to the wealth of information provided on the aeronautical charts and publications of the National Oceanic and Atmospheric Administration (NOAA). This guide can also serve as a basic review of chart information for experienced pilots"--Introduction.

INTRODUCTION This Chart User's Guide is an introduction to the Federal Aviation Administration's (FAA) aeronautical charts and publications. It is useful to new pilots as a learning aid, and to experienced pilots as a quick reference guide. The FAA is the source for all data and information utilized in the publishing of aeronautical charts through authorized publishers for each stage of Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) air navigation including training, planning, and departures, enroute (for low and high altitudes), approaches, and taxiing charts.

Effective as of 16 July 2020. Most others are outdated. This Chart User's Guide is an introduction to the Federal Aviation Administration's (FAA) aeronautical charts and publications. It is useful to new pilots as a learning aid, and to experienced pilots as a quick reference guide. The FAA is the source for all data and information utilized in the publishing of aeronautical charts through authorized publishers for each stage of Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) air navigation including training, planning, and departures, enroute (for low and high altitudes), approaches, and taxiing charts. The Notices to Airmen Publication (NOTAM) includes current Flight Data Center (FDC) NOTAMs. NOTAMs alert pilots of new regulatory requirements and reflect changes to Standard Instrument Approach Procedures (SIAPs), flight restrictions, and aeronautical chart revisions. Aeronautical information changes rapidly, so it is important that pilots check the effective dates on each aeronautical chart and publication. To avoid danger, it is important to always use current editions and discard obsolete charts and publications. All graphics used in this guide are for educational purposes. Chart symbology may not be to scale. Please do not use them for flight navigation. The Chart User's Guide is updated as necessary when there is new chart symbology or changes in the depiction of information and/or symbols on the charts. When there are changes, it will be published in accordance with the 56-day aeronautical chart product schedule. Black and white print.
