The merger was a failure. In 2006, Chrysler declared a loss of \$1.5 billion. Daimler sold Chrysler to the American private equity firm, Cerberus Capital Management in 2007. By 2008, Chrysler was once again asking Congress for a loan. In July 2011, Fiat became the majority shareholder after purchasing the remaining stakes held by the government.

What Could Possibly Go Wrong... is the sixth book in Jeremy Clarkson's bestselling The World According to Clarkson series. No one writes about cars like Jeremy Clarkson. While most correspondents are too busy diving straight into BHP, MPG and MPH, Jeremy appreciates that there are more important things to life.

Don't worry, we'll get to the cars. Eventually. But first we should consider:

- The case for invading France
- The overwhelming appeal of a nice sit-down
- The inconvenience of gin and tonic
- Why clothes are no better than ice cream
- Spot-welding with the Duchess of Kent
- And why Denmark is the best place in the world

Armed only with conviction, curiosity, enthusiasm and a stout pair of trousers, Jeremy hurtles around the world - along motorway, autoroute, freeway and autobahn - in search of answers to life's puzzles and ponderings without forethought or fear for his own safety. What, you have to ask, could possibly go wrong... Praise for Clarkson: 'Brilliant... laugh-out-loud' Daily Telegraph 'Outrageously funny... will have you in stitches' Time Out 'Very funny . . . I cracked up laughing on the tube' Evening Standard

This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and

Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s: • The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s. • The upgrading of the automotive industry in East-Central Europe through FDI • The position of ECE in the automotive industry research and development (R&D) • The effects of the 2008-2009 economic crisis in the automotive industry of ECE. • The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s. • The effects of FDI on domestic firms in

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world ' s largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a

result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing

transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

Nothing is new under the sun and classic cars books come and go. But here, instead of a heavy, large, glossy book of classic car images and details destined to stay on a shelf, is something new. This book is designed to be read as a companion, a book that can go in the car or on a 'plane, and which can be read in full, or dipped into anywhere for a classic car fix. Old stories and new details are presented and cover all eras of our cars. Gathered here is a compilation of the author's published and unpublished adventures and opinions about the design and the driving of some of the greatest cars in motoring history. From 'vintagent' to 'modern classic', pristine to oily-rag, up hill, down dale and across continents, award-winning motoring author, designer and serial classic car owner, Lance Cole, charts the great classic car enthusiasm in a series of engaging essays about cars, car design and the

men that made the motor industry. From tales of Malcolm Sayer to Bedelia, and of BMW, Jaguar, Bugatti and Porsche, to tales of old Saabs and rusty Citroens, classic car life is here. Erik Carlsson, Jacques Gerin, Giovanni Michelotti and Innes Ireland are just a few of the names that can be found in these pages. From design to driving, here is a book that is a classic car adventure.

Nobel Peace Prize Laureate Aung San Suu Kyi—known to the world as an icon for democracy and nonviolent dissent in oppressed Burma, and to her followers as simply “ The Lady ” —has recently returned to international headlines. Now, this major new biography offers essential reading at a moment when Burma, after decades of stagnation, is once again in flux. Suu Kyi ’ s remarkable life begins with that of her father, Aung San. The architect of Burma ’ s independence, he was

assassinated when she was only two. Suu Kyi grew up in India (where her mother served as ambassador), studied at Oxford, and worked for three years at the UN in New York. In 1972, she married Michael Aris, a British scholar. They had two sons, and for several years she lived as a self-described “housewife” —but she never forgot that she was the daughter of Burma’s national hero. In April 1988, Suu Kyi returned to Burma to nurse her sick mother. Within six months, she was leading the largest popular revolt in the country’s history. She was put under house arrest by the regime, but her party won a landslide victory in the 1990 elections, which the regime refused to recognize. In 1991, still under arrest, she received the Nobel Peace Prize. Altogether, she has spent over fifteen years in detention and narrowly escaped assassination twice. Peter Popham distills five years of research—including covert trips to Burma, meetings with Suu Kyi and
