Corporate finance refers to the acquisition and use of funding for private companies, for purposes including capital financing, capital investments, and short-term budget. As such, savvy decision-making in this area can have critically important consequences for the successful strategic management of a business, with impacts on valuation, cash flow, and other key determinants of financial health.

Corporate finance for the pre-industrial  
world began to emerge in the Italian city-  
states and the low countries of Europe from  
the 15th century. Public markets for  
investment securities developed in the Dutch  
Republic during the 17th century. By the  
early 1800s, London acted as a center of  
corporate finance for companies around the  
world, which innovated new forms of lending  
and investment.
