Ansys Innovation Courses are free, online physics and engineering courses. The ever-expanding course offering is designed with educators, students and engineers in mind. High school educators and college professors can assign the courses to enhance simulation and physics learning in the classroom, while students and engineers can take these self-paced courses to deepen their understanding of selected subjects.

This course is all about learning and completing the Essential training required for practical usage of the Ansys Workbench Software. This course is divided into Theoretical and Practical Sessions. In the Theoretical session, you will be introduced to the basic theoretical concepts regarding FEA, Meshing, Static Structural, Modal, Thermal, Thermo-structural, and buckling analysis.

software. The course is created by Sijal Ahmed, who is a professional CFD Engineer and Instructor. During the course, the instructor will provide you complete guidance on how to use commercial CFD codes, such as Fluent, CFX, ICEMCFD, Ansys Meshing, and Ansys Workbench. Besides, you will also learn how to define problems, create geometry, clean and prepare geometry, Hexa and tetra mesh generation in ICEMCFD, and much more.
