Businesses and governments worldwide are increasingly being disrupted by more frequent natural disasters, mounting workforce violence, and skyrocketing cyber attacks. It's increasingly a question of "when" - not "if" - they will face such a crisis. This book tells you how to prepare - step-by-step. The good news is that costs of being prepared are minuscule compared to the staggering hits organizations are increasingly taking. This book gets into the nitty-gritty of preparing for such crises - from building senior management support and involvement . . . to training top-flight crisis management teams. Specifically, it tells business continuity and crisis management professionals how to get their organizations into a constant state of readiness. That's crucial since, of course, organizations don't know the precise nature of the crisis in advance (timing, location, or impact). Think in terms of "instant-on." And, they have to have wide range of contingencies to deal with whatever they may face. Regina Phelps tells you exactly how to do all of that step-by-step . . . and how to build support up and down the organization to make it happen.

Crises affect all of us. As managers, we need to identify potential crises and deal with them as best we can. We can't prevent all crises but we can avoid some and prepare for others. Managing Crises offers a practical hands-on method for looking at crises - from developing a crises audit to learning from past crises.
