Preface.

Ethnic Chinese in Southeast Asia, like Jews in Central Europe until the Holocaust, have been remarkably successful as an entrepreneurial and professional minority. Whole regimes have sometimes relied on the financial underpinnings of Chinese business to maintain themselves in power, and recently Chinese businesses have led the drive to economic modernization in Southeast Asia. But at the same time, they remain, as the Jews were, the quintessential outsiders. In some Southeast Asian countries they are targets of majority nationalist prejudices and suffer from discrimination, even when they are formally integrated into the nation. The essays in this book explore the reasons why the Jews in Central Europe and the Chinese in Southeast Asia have been both successful and stigmatized. Their careful scholarship and measured tone contribute to a balanced view of the subject and introduce a

historical depth and comparative perspective that have generally been lacking in past discussions. Those who want to understand contemporary Southeast Asian and the legacy of the Jewish experience in Central Europe will gain new insights from the book.

Stephen M. Cherry draws upon a rich set of ethnographic and survey data, collected over a six-year period, to explore the roles that Catholicism and family play in shaping Filipino American community life. From the planning and construction of community centers, to volunteering at health fairs or protesting against abortion, this book illustrates the powerful ways these forces structure and animate not only how first-generation Filipino Americans think and feel about their community, but how they are compelled to engage it over issues deemed important to the sanctity of the family. Revealing more than intimate accounts of Filipino American lives, Cherry offers a glimpse of the often hidden but vital relationship between religion and community in the lives of new immigrants, and allows speculation on the broader impact of Filipino immigration on the nation. The Filipino American community is the second-largest immigrant community in the United States, and the Philippines is the second-largest source of Catholic immigration to this country. This ground-breaking study outlines how first-generation Filipino Americans have the potential to reshape American Catholicism and are already having an impact on American civic life through the engagement of their faith.
