ECG, NTE, and SK are lines of universal replacement semiconductors. The underlying concept is that each ECG, NTE, or SK numbered device can replace a group of other semiconductors. For example, the single most popular ECG and NTE transistor, the 123AP, replaces thousands of different OEM and industry standard part numbered transistors. When the Delco DTS line of power transistors were discontinued, SIE began using the ECG165 in their 300 volt downhole power supplies (the later schematics ...
