Questo testo offre una gamma ampia di esercizi risolti, tramite dettagliati passaggi matematici (rivolti in modo particolare agli studenti che non hanno un background adeguato), che, assieme ai riferimenti teorici, permette ai lettori un apprendimento graduale e sistematico dei problemi basilari di Microeconomia. Corredato da numerosi grafici, da tabelle riassuntive, utili per l ' apprendimento ed il ripasso della materia, e da un ' appendice matematica sulle derivate e sulle probabilita , l ' Eserciziario di Microeconomia si rivolge agli studenti dei primi anni di Universita ed anche a coloro che vogliono approfondire le tematiche proposte.

Robert Frank ' s Microeconomics and Behavior covers the essential topics of microeconomics while exploring the relationship between economics analysis and human behavior. The book ' s clear narrative appeals to students, and its numerous examples help students develop economic intuition. This book introduces modern topics not often found in intermediate textbooks. Its focus throughout is to develop a student ' s capacity to " think like an economist. "

All specialist economics students, plus students taking a non-specialist module, and social science students taking an economics module will need this book.

This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk and uncertainty, assymetric information and game theory. Traditional topics are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost, and examples are included throughout the text to reinforce the material presented.

A clear and concise history of economic thought, developed from the author's award-winning book, The Wealth of Ideas.

Check out preview content for Essentials of Economics here. Essentials of Economics brings the same captivating writing and innovative features of Krugman/Wells to the one-term economics course. Adapted by Kathryn Graddy, it is the ideal text for teaching basic economic principles, with enough real-world applications to help students see the applicability, but not so much detail as to overwhelm them. Watch a video interview of Paul Krugman here.

"Macroeconomics : A European Perspective" will give students a fuller understanding of the subject and has been fully updated to provide broad coverage of the financial crisis. In particular, this new edition provides : new data on Europe and the financial crisis, European economic and monetary integration, the Euro and high debt, Iceland's recent interest in euro membership, Poland's strong economy, new graphs and tables include the FT30 index.

This comprehensive survey of transportation economic policy pays homage to a classic work, Techniques of Transportation Planning, by renowned transportation scholar John R. Meyer. With contributions from leading economists in the field, it includes added emphasis on policy developments and analysis. The book covers the basic analytic methods used in transportation economics and policy analysis; focuses on the automobile, as both the mainstay of American transportation and the source of some of its most serious difficulties; covers key issues of urban public transportation; and analyzes the impact of regulation and deregulation on the U.S. airline, railroad, and trucking industries. In addition to the editors, the contributors are Alan A. Altshuler, Harvard University; Ronald R. Braeutigam, Northwestern University; Robert E. Gallamore, Union Pacific Railroad; Arnold M. Howitt, Harvard University; Gregory K. Ingram, The Wold Bank; John F. Kain, University of Texas at Dallas; Charles Lave, University of California, Irvine; Lester Lave, Carnegie Mellon University; Robert A. Leone, Boston University; Zhi Liu, The World Bank; Herbert Mohring, University of Minnesota; Steven A. Morrison, Northeastern University; Katherine M. O'Regan, Yale University; Don Pickrell, U.S. Department of Transportation; John M. Quigley, University of California, Berkeley; Ian Savage, Northwestern University; and Kenneth A. Small, University of California Irvine.
