Science facilitation is not a scientific process, it is an art. This is a skill of which there are huge variations of talent. It has tools, techniques and instruments, which a skilled practitioner may use to create meaningful and purposed conversation.

Science facilitation is an art in elicitation and not a ...

Remember facilitation is an art and not a science. You're constantly making decisions about what to do in every situation: some you get right but some you won't. But the skills involved – observation, listening, reading body language, understanding human behaviour and stepping out of the content – can all be achieved through practise.

Management is a Science as well as Art. Science teaches us to know while art teaches us to do. To be successful, managers have to know and do things effectively and efficiently. This requires a unique combination of both science and art of managing in them. It may, however, be said that the art of managing begins where the science of managing ...
