Family activity and eating habits questionnaire

Parents bring foods into the house. They control how much time a child can watch TV. They control what kinds of social activities are paired with foods. And kids learn a huge amount about eating and physical activity from watching and imitating their parents. Epstein's research shows how important parents can be.

Shape Your Family's Habits | NIH News in Health

By punishing your kids with eating vegetables, or rewarding your kids with sweets, you are attaching emotions to these foods. Those vegetables will now be associated with fear and unhappiness, and those desserts will be associated with feelings of joy and reward. This is a slippery slope and may lead to emotional eating in the future.

And the effect your actions have can be profound. For example, research has shown that just eating together as a family can improve children's nutritional health. 2 In families who shared at least three meals a week, children were 24 percent more likely to be eating healthy foods than those in families who ate few or no meals together. The children were also 12 percent less likely to be overweight, 20 percent less likely to eat unhealthy foods and 35 percent less likely to engage in ...

Healthy habits for healthy families

Around the World, millions of children learn by imitating their parents and family members, who become role models. Families play a crucial role in giving healthy behaviours to their children including eating habits, in order to raise them with strong learnings for a healthy future. Future global health depends on the health of today's children. Those children who establish healthy eating and activity behaviours early in life are well-equipped to maintain their good health far into ...
