and updated throughout, presents data for 26 commonly used neuropsychological tests, including: Trailmaking, Color Trails, Stroop Color Word Interference, ...

Oxford University Press :: Handbook of Normative Data for ...

Definition. Normative data is data from a reference population that establishes a baseline distribution for a score or measurement, and against which the score or measurement can be compared. Normative data is typically obtained from a large, randomly selected representative sample from the wider population. They can be used to easily transform individual scores or measurements directly into standardized z-scores, T scores, or quantiles.
