Hyperkinetic movement disorders comprise a range of diseases characterized by unwanted and uncontrollable, or poorly controllable, involuntary movements. The phenomenology of these disorders is quite variable encompassing chorea, tremor, dystonia, myoclonus, tics, other dyskinesias, jerks and shakes. Discerning the underlying condition can be very difficult given the range and variability of symptoms. But recognizing the phenomenology and understanding the pathophysiology are essential to ensure appropriate treatment. Hyperkinetic Movement Disorders provides a clinical pathway for effective diagnosis and management of these disorders. The stellar international cast of authors distills the evidence so you can apply it into your practice. The traditional definition of torts involves bizarre, idiosyncratic events where a single plaintiff with a physical impairment sues the specific defendant he believes to have wrongfully caused that malady. Yet public attention has focused increasingly on mass personal-injury lawsuits over asbestos, cigarettes, guns, the diet drug fen-phen, breast implants, and, most recently, Vioxx. Richard A. Nagareda's Mass Torts in a World of Settlement is the first attempt to analyze the lawyer's role in this world of high-stakes, multibillion-dollar litigation. These mass settlements, Nagareda argues, have transformed the legal system so acutely that rival teams of lawyers operate as sophisticated governing powers rather than litigators. His controversial solution is the replacement of the existing tort system with a private administrative framework to address both current and future claims. This book is a must-read for concerned citizens, policymakers, lawyers, investors, and executives grappling with the changing face of mass torts.

The classic reference work that provides annually updated information on the countries of the world.
