All across the country, a growing number of children are dropping out of organized sports—not because they don't like to play, but because the system they play in is failing them. Written by one of this country's leading advocates of youth sports, Why Johnny Hates Sports explains why many of the original goals of youth leagues have been affected by today's win-at-all-costs attitude. It then documents the negative physical and psychological impact that parents, coaches, and administrators can have on children, while providing effective solutions to each of the problems covered. Why Johnny Hates Sports is both an exposé of abuses and a call to arms. It clearly illustrates a serious problem that has plagued youth sports for too long. Most important, it provides practical answers that can alter this destructive course.

The New Plantation examines the controversial relationship between predominantly White NCAA Division I Institutions (PWI's) and black athletes, utilizing an internal colonial model.

What does it mean when a hit that knocks an American football player unconscious is cheered by spectators? What are the consequences of such violence for the participants of this sport and for the entertainment culture in which it exists? This book brings together scholars and sport commentators to examine the relationship between American football, violence and the larger relations of power within contemporary society. From high school and college to the NFL, Football, Culture, and Power analyses the social, political and cultural imprint of America's national pastime. The NFL's participation in and production of hegemonic masculinity, alongside its practices of racism, sexism, heterosexism and ableism, provokes us to think deeply about the historical and contemporary systems of violence we are invested in and entertained by. This social scientific analysis of American football considers both the positive and negative power of the game, generating discussion and calling for accountability. It is fascinating reading for all students and scholars of sports studies with an interest in American football and the wider social impact of sport.

In this book, the story of how IKEA and its paper producers struggled to solve the problem of creating environmentally friendly paper constitutes the foundation of a discussion of technological development. Through a detailed analysis of the case-study, the authors demonstrate the necessity of including social, technological and economical factors when dealing with such issues. Focusing on the interactive aspects of commercial and technological development, they examine how new solutions are developed and shaped in relation to the different companies and organizations involved. They investigate resources in terms of how they are related and built into other resources through historical and contemporary interaction processes. Their overall emphasis is on dealing with the issue of how different, closely and distantly related companies and organizations are affected when resources are developed.
