The S&P futures pit is the ultimate arena for traders. It is a place where trading titans make split-second decisions on huge amounts of money, and fortunes appear and vanish with the blink of an eye. Successful day traders are brilliant, aggressive-and lucky. Lewis J. Borsellino is all three. And now he is telling his story. The nation's top S&P futures trader, Borsellino takes you inside the world of the day trader. Chronicling Borsellino's incredible run on the floor of the Chicago Mercantile Exchange, *The Day Trader* offers a rare behind-the-scenes look at his everyday strategies and tactics. Raised to be a fierce and fearless competitor, Borsellino felt at home the first day he walked into the chaos and excitement of the Merc. In *The Day Trader*, he offers both a compelling story as well as an inside look at day trading and the S&P market. Borsellino outlines exactly what contributed to his unparalleled success—a rare blend of discipline, drive, intelligence, and an uncanny ability to read and interpret the market. *The Day Trader* is also a candid memoir of a second generation Italian American who learned tough life lessons from his father. The senior statesman of the S&P pit, Borsellino offers vivid firsthand accounts of the unique dynamics of the trading floor, the fortunes won and lost in the crash of 1987, the FBI investigation that rocked the futures trading industry, and the tense political battles between Merc titans Leo Melamed and Jack Sandner. He also shares war stories from the floor, many involving top traders such as Richard Dennis and George Soros. Finally, Borsellino chronicles the latest phase of his career, as he moves beyond the beloved trading pit to the challenges and opportunities of the electronic trading arena. More than the success story of one the nation's most respected traders, *The Day Trader* offers practical insights into the futures markets, pit trading, market psychology, fundamental and technical analysis, and risk. It is a rare opportunity to see inside the mind of one of today's most brilliant traders. LEWIS J. BORSELLINO is the top S&P futures trader in the United States with a career that has spanned an unprecedented 18 years. His long-term success puts him into the trading pantheon that features such luminaries as Paul Tudor Jones, Victor Niederhoffer, and bond trader Tom Baldwin. Borsellino is a frequent contributing commentator on CNN and CNBC where he is regarded as the "biggest and best trader" in S&Ps. PATRICIA CRISAFULLI COMMINS is a freelance business writer and

Created by former floor trader Jonathan Hoenig, THE PIT features lush, color and B&W photos of the trading floor's most thrilling era along with an epilogue documenting its final years.

An inside look at a Wall Street trading room and what this reveals about today's financial system. Debates about financial reform have led to the recognition that a healthy financial system doesn't depend solely on how it is structured—organizational culture matters as well. Based on extensive research in a Wall Street derivatives-trading room, *Taking the Floor* considers how the culture of financial organizations might change in order for them to remain healthy, even in times of crises. In particular, Daniel Beunza explores how the extensive use of financial models and trading technologies over the recent decades has exerted a far-ranging and troubling influence on Wall Street. How have models reshaped financial markets? How have models altered moral behavior in organizations? Beunza takes readers behind the scenes in a bank unit that, within its firm, is widely perceived to be “a class act,” and he considers how this trading room unit might serve as a blueprint solution for the ills of Wall Street's unsustainable culture. Beunza demonstrates that the integration of traders across desks reduces the danger of blind spots created by models. Warning against the risk of moral disengagement posed by the use of models, he also contends that such disengagement could be avoided by instituting moral norms
