Victoria's Box – Ironbark region is one of the most important areas of animal diversity and significance in southern Australia. The forests and woodlands of this region provide critical habitat for a diverse array of woodland-dependent animals, including many threatened and declining species such as the Squirrel Glider, Brush-tailed Phascogale, Regent Honeyeater, Swift Parrot, Pink-tailed Worm-Lizard, Woodland Blind Snake, Tree Goanna and Bibron's Toadlet. Wildlife of the Box – Ironbark Country gives a comprehensive overview of the ecology of the Box – Ironbark habitats and their wildlife, and how climate change is having a major influence. This extensively revised second edition covers all of the mammals, birds, reptiles and frogs that occur in the region, with a brief description of their distribution, status, ecology and identification, together with a detailed distribution map and superb colour photograph for each species. The book includes a 'Where to watch' section, featuring a selection of national parks, state parks and nature conservation reserves where people can experience the ecosystem and its wildlife for themselves. This book is intended for land managers, conservation and wildlife workers, fauna consultants, landholders, teachers, students, naturalists and all those interested in learning about and appreciating the wildlife of this fascinating and endangered ecosystem.

Jake Andersen is a proud Currency lad with a swagger in his step and a joke for his mates, until he discovers the wife he is besotted with has left him, and taken their young daughter with her. A prize fighter, Jake decides to take matters into his own hands and find his wife, and the mongrel she ran off with. Fuelled by revenge he starts a long search across the colony and vows to never trust "good women" again. Few people seem to think a gypsy girl like Keziah Stanley could ever be a "good woman". Separated by the law from her beloved gypsy husband, Keziah decides to travel to Australia to find the love of her life. With her tarot cards and strong beliefs, Keziah boasts she can read anybody's future, but her own life is proving harder to read, let alone manage. Daniel Browne already knows what his future will be: the life of a great artist. And he is determined to follow his dream; no matter what. When this volatile trio is thrown together in Australia, they form an extraordinary, unexpected alliance that will challenge the establishment. Love, hate, survival and revenge: all will discover the truth.

Forest Trees of Australia is the essential reference for observing, identifying and obtaining information on the native trees in this country. It describes and illustrates over 300 of the most important indigenous trees, which have been carefully selected for their environmental significance, their importance to the timber industry, or their prominence in the landscape. This new and thoroughly revised edition has been fully updated throughout and includes treatments of 72 additional species. New maps and photographs show a wonderfully diverse range of forests, from mangrove swamps, tropical regions and deserts, to alpine areas and majestic stands of temperate forests. A color section illustrates some of the major forest types of Australia and bark from a diverse range of species. Forest Trees of Australia is an unsurpassed guide to identification for horticulturists, botanists, foresters, students, farmers, environmentalists and all those who are interested in Australian native trees.
