### Javascript: the weird parts -- Charlie Harvey

JavaScript is free to use for everyone. JavaScript References. W3Schools maintains a complete JavaScript reference, including all HTML and browser objects. The reference contains examples for all properties, methods and events, and is continuously updated according to the latest web standards.

---

### JavaScript Tutorial

JavaScript can "display" data in different ways: Writing into an HTML element, using innerHTML. Writing into the HTML output using document.write (). Writing into an alert box, using window.alert ().

---

### JavaScript Output - W3Schools

As with many things in JavaScript, creating an object often begins with defining and initializing a variable. Try entering the following line below the JavaScript code that's already in your file, then saving and refreshing: `const person = {};` Now open your browser's JavaScript console, enter person into it, and press Enter / Return.
