Jazz: America's Classical Music is a delightful introduction and guide to this complex and compelling music and to its rich history. In an engaging and conversational style, renowned jazz teacher Grover Sales tells of the lives and music of the greats—Ellington, Tatum, Hawkins, Coltrane, Parker, Hines, Goodman, Armstrong, and many others—with a mix of important facts, fascinating anecdotes, and brilliant interpretations. Illustrated with astonishing photographs of the artists in performance, Jazz: America's Classical Music is a classic text, an ideal book for beginners and an inspiring one for serious students of the art of jazz.

For almost half a century, Amiri Baraka has

ranked among the most important commentators on African American music and culture. In this brilliant assemblage of his writings on music, the first such collection in nearly twenty years, Baraka blends autobiography, history, musical analysis, and political commentary to recall the sounds, people, times, and places he's encountered. As in his earlier classics, *Blues People* and *Black Music*, Baraka offers essays on the famous—Max Roach, Charlie Parker, Miles Davis, John Coltrane—and on those whose names are known mainly by jazz aficionados—Alan Shorter, Jon Jang, and Malachi Thompson. Baraka's literary style, with its deep roots in poetry, makes palpable his love and respect for his jazz musician friends. His energy and enthusiasm show us again how much Coltrane, Albert Ayler, and the others he lovingly considers mattered. He brings home to us how music itself matters, and how musicians carry and extend that knowledge from generation to generation, providing us, their listeners, with a sense of meaning and belonging.

This book offers compelling new perspectives on the revolutionary potential of improvisation pedagogy. Bringing together contributions from leading musicians, scholars, and teachers from around the world, the volume articulates how improvisation can breathe new life into old curricula; how it can help teachers and students to communicate more effectively; how it can break down

damaging ideological boundaries between classrooms and communities; and how it can help students become more thoughtful, engaged, and activist global citizens. In the last two decades, a growing number of music educators, music education researchers, musicologists, cultural theorists, creative practitioners, and ethnomusicologists have suggested that a greater emphasis on improvisation in music performance, history, and theory classes offers enormous potential for pedagogical enrichment. This book will help educators realize that potential by exploring improvisation along a variety of trajectories. Essays offer readers both theoretical explorations of improvisation and music education from a wide array of vantage points, and practical explanations of how the theory can be implemented in real situations in communities and classrooms. It will therefore be of interest to teachers and students in numerous modes of pedagogy and fields of study, as well as students and faculty in the academic fields of music education, jazz studies, ethnomusicology, musicology, cultural studies, and popular culture studies.

In his 2009 article, *Can Jazz Be Saved?*, Wall Street Journal columnist Terry Teachout asserted that the American audience for jazz music performances was both shrinking and aging. *Saving Jazz: Applied Ethnomusicology and America's Classical Music* explores this jazz audience problem and finds that over the last thirty years the overall American audience for live jazz performances has not shrunk as has been widely reported, but is essentially unchanged in size. During that same period, though, there is no question that the median age of the audience has changed dramatically. Data collected by the National Endowment for the Arts and the Doris Duke Charitable Trust funded Jazz Audiences Initiative shows that the median age has increased from 29 to over 46 years of age - a precipitous aging. If this aging continues, the audience will soon experience significant numerical decline as many jazz enthusiasts are now in their retirement years. In order to counter the audience's aging and lack of numerical growth, this thesis collects and explores the best ideas for stimulating the growth of the jazz audience, especially among younger enthusiasts. The thesis culminates in presenting a newly developed Jazz Stakeholder Model, designed to communicate a specific set of action items to members of the overall

jazz community. In this model, five jazz stakeholders, Enthusiasts, Educators, Presenters, Writers, and Artists are encouraged to take specific, concrete steps to affect positive change in bringing about a younger and larger audience for live jazz performances in America. (The idea of a jazz community where members have distinct, but essential, functions in promoting the future of the music was originally presented in a 1999 article by Willard Jenkins entitled, Where's the Jazz Audience? In some cases I have broadened and in others collapsed Jenkins' categories, but am nonetheless indebted to him for the underlying idea for what I have termed stakeholders.)

wider culture. *The Rest Is Noise* is an astonishing history of the twentieth century as told through its music.

One of *The Telegraph's* Best Music Books 2011 Alex Ross's award-winning international bestseller, *The Rest Is Noise: Listening to the Twentieth Century*, has become a contemporary classic, establishing Ross as one of our most popular and acclaimed cultural historians. *Listen to This*, which takes its title from a beloved 2004 essay in which Ross describes his late-blooming discovery of pop music, showcases the best of his writing from more than a decade at *The New Yorker*. These pieces, dedicated to classical and popular artists alike, are at once erudite and lively. In a previously unpublished essay, Ross brilliantly retells hundreds of years of music history—from Renaissance dances to Led Zeppelin—through a few iconic bass lines of celebration and lament. He vibrantly sketches canonical composers such as Schubert, Verdi, and Brahms; gives us in-depth interviews with modern pop masters such as Björk and Radiohead; and introduces us to music students at a Newark high school and indie-rock hipsters in Beijing. Whether his subject is Mozart or Bob Dylan, Ross shows how music expresses the full complexity of the human condition. Witty, passionate, and brimming with insight, *Listen to This* teaches us how to listen more closely.
