Power comes from within and from without. How to tap its many sources.

The key to success in life and business is to become a master at Conversational Intelligence. It's not about how smart you are, but how open you are to learn new and effective powerful conversational rituals that prime the brain for trust, partnership, and mutual success. Conversational Intelligence translates the wealth of new insights coming out of neuroscience from across the globe, and brings the science down to earth so people can understand and apply it in their everyday lives. Author Judith Glaser presents a framework for knowing what kind of conversations trigger the lower, more primitive brain; and what activates higher-level intelligences such as trust, integrity, empathy, and good judgment. Conversational Intelligence makes complex scientific material simple to understand and apply through a wealth of easy to use tools, examples, conversational rituals, and practices for all levels of an organization.

Virtual work isn't the model of the future-it's here now. But many companies struggle with setting their employees free from the office without sacrificing culture. Centric Consulting president Larry English is here to guide the way. Twenty years ago, Larry and his friends weren't happy in their consulting jobs. The long hours took a serious toll on their personal lives. So they built their own company where employees could work virtually and the culture would contribute to both the business's success and employee happiness. Since then, Centric Consulting has expanded to over 1,000 team members with operations in 12 US cities and India-and everyone works remotely some or most of the time. As Larry unpacks everything he's discovered about creating and sustaining a culture of collaborative teams, you'll learn: How and why you need to cultivate an atmosphere of trust in a virtual environment How to recruit and hire team members for remote work How to build strong relationships with people you don't see every day How to scale your virtual company without sacrificing culture How the right software tools can help build culture How to be a great virtual team member Sprinkled with funny, insightful stories from Larry and other Centric employees, *Office Optional: How to Build a Connected Culture with Virtual Teams* is the ultimate guidebook to remote work and a successful virtual culture.

Lack of Agility is the kiss of death. Position your company to succeed in world of change. To edge out the competition in today's disruptive environment, you need to ensure that your company is agile—that it can respond to change instantly and effectively. Because fast and furious change is the only thing you can count on in business today. Network expert Michael Arena helped enable GM's legendary turnaround. In these pages, he explains how you can transform your own company through the concept of adaptive space. Based on hundreds of interviews and the author's own groundbreaking study of dozens of organizations spanning a variety of industries, *Adaptive Space* shows how to position your company for today—and for the future—by enabling creativity, innovation, and novel ideas to flow freely among teams, across departments, and throughout the company. Using GM as the main case study—along with the stories of other highly adaptive organizations, like Apple, Amazon, Disney, and Gore—Arena provides a model you can follow to reinvent your company. It's about inspiring employees

to explore new ideas, empowering the most creative people and teams to spread their ideas across the organization, and operationalizing the entrepreneurial spirit so adaptability is set in stone. Hesitation is a killer in today's business landscape. With Adaptive Space, you have everything you need to confront disruption with smart, confident actions and seize the valuable opportunities that come with change.

Provides a chapter of easy to follow and actionable tips for each of the areas identified as leadership competencies including: dealing with ambiguity, conflict management, and strategic agility.

The success of your daily interactions with others, whether during formal meetings or encounters at the water cooler, can make or break your success in the workplace. Having interpersonal skills will allow you to motivate, inspire, and successfully lead others, as well as further your own career development. This guidebook will show you how, through self-awareness and strategic implementation of behaviors, you can utilize interpersonal savvy to make the most out of negative situations, develop and lead others, and create a positive working environment despite daily challenges and hardships.

Sure, It leaders need technological savvy and business acumen to understand and contribute to their company's goals. But the best of them possess a far more potent ability: They forge superior working relationships companywide to collaboratively deliver business results.

The Leadership Machine describes the four fundamentals of management and leadership development:- The competencies/skills that matter for leading in new and different situations - How skills are developed - Who is best equipped to learn these skills - What it takes to make development work.
