need of MBA students for a book written primarily from an Indian perspective. It explores core concepts and theories of organizational behaviour through managerial applications. The book contains well-illustrated chapters on globalization and the changing profile of employees and customers, culture and the organization, the process of decision making and consensus building, and developing attitudes and values. It provides in-depth coverage of issues and challenges faced by Indian organizations in the areas of traditional culture and modern management, emotional intelligence, the process approach to organizational behaviour, the role of personality and leadership styles, and the roles and functions of the individual, the team, and the organization. Also discussed are key concepts, such as societal culture and organizations,

managing work motivation, and preventing and managing conflicts in organizations. Users will find this book highly useful for its applications of theoretical concepts through discussions of individual and team behaviour from actual workplace situations, caselets, and illustrations. Highlights contains

This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology.

A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also
