Medical Case Studies for the Paramedic contains 20 case studies representing a variety of medical emergencies that the paramedic may encounter in the field. Each case study begins by presenting dispatch information and a general impression of the patient upon arriving at the scene. Then, as the case progresses, pertinent patient information is provided, interspersed with a series of standardized questions designed to assess the paramedic's ability in correlating specific signs and symptoms with a particular medical condition and providing the appropriate treatment.

Written by a distinguished nursing professional with over 25 years of experience, Pharmacology Case Study Workbook provides nursing students with an opportunity to apply pharmacology concepts to real-world situations. The text features 50 case studies based on real-life clinical situations that challenge students to think critically and develop effective problem-solving skills. Case studies present patients' medication history, enabling students to learn about the disease process from the point of medication use – an approach used in actual clinical practice. Other features include a review of key terms, home and intensive care scenarios, and a list of variables that must be considered in order to conduct an appropriate case analysis. Also present are a series of questions that will help guide students in developing effective ways to handle the scenario. Perfect for individual or group use, Pharmacology Case Studies is a valuable tool to help prepare nursing students for clinical practice!

Chinese internal medicine is the foundation of clinical practice of Chinese medicine and covers a large variety of diseases and symptoms. Developing expertise in every internal disease requires a lot of practice and extensive studies. However, after mastering the theory of Chinese medicine and classical understanding of the etiology and pathomechanism of diseases, the practitioner must acquire many years of clinical practice. One could spend years accumulating firsthand experience. However, since there is ample information collected from successful cases studies available to us, it is highly profitable for the practitioner to analyze and grasp the knowledge through the experience of the masters that came before them. In this approach, medicine itself will continue to evolve and improve. This collection of internal medicine clinical cases contains clear and detailed analysis of commonly seen diseases such as diabetes, Parkinson's Disease, post stroke sequelae, insomnia, epilepsy, bipolar disorder, emaciation, rheumatoid arthritis and many more. These medical cases are concrete and filled with medical knowledge from experts on the theory, treatment principles and methods with medicinals, formulas, acupuncture and moxibustion. In addition, to deepen the level of understanding of the diseases, comprehension questions have been added at the end of each chapter with detailed answers. This clinical case study collection is a most for all practitioners of Chinese medicine.
