Greeff, Jaco M. 2002. Mating system and sex ratios of a pollinating fig wasp with dispersing males. Proceedings of the Royal Society of London. Series B: Biological Sciences, Vol. 269, Issue. 1507, p.

English in academic and professional settings has received great attention over the last 50 years, as its use has become a key asset for anyone interested in improving his/her chances of communicating internationally. However, it still offers rich opportunities for teachers and researchers working on English in specific settings. The aim of English for Professional and Academic Purposes is to offer an overview of several topics within the field of discourse analysis applied to English in academic and professional domains. The book compiles contributions from different origins, ranging from Japan to the USA and several European countries, and covers English as a native, second, foreign and international language. It also deals with various specialities, including academic writing, business discourse or English for medicine, nursing, maritime industry and science and engineering. This volume is divided into three sections: Discourse Analysis of English for Academic Purposes, Professional English and EPAP Pedagogy, since it was conceived as a contribution to the research on how English is analysed as both the discourse of and for effective communication in academic and professional settings, and how it can be applied to teaching. This manuscript offers some fresh insights for those involved or interested in this field of expertise, in an attempt to shed some light on its latest innovations.

This book is a printed edition of the Special Issue "Sustainable Agriculture – Beyond Organic Farming" that was published in Sustainability

This addition to the Handbook series is presented in five sections. The first sections covers basic and applied science, including biomechanics, the physiologic demands of volleyball, conditioning and nutrition. The second section looks at the role of the medical professional in volleyball, covering team physicians, pre-participation examination, medical equipment at courtside and emergency planning. The third section looks at injuries - including prevention, epidemiology, upper and lower limb injuries and rehabilitation. The next section looks at those volleyball players who require special consideration: the young, the disabled, and the elite, as well as gender issues. Finally, section five looks at performance enhancement.

This acts as a reference work for the field of high intensity and/or high plasma density laser-plasma interactions for years to come. It covers everything from single particles to dense fluids, from computational physics to the practical results in fusion. In addition, it contains treatments of the theory of electrodynamics, laser-driven hydrodynamics, the Lorentz force, complex refractive index and relativistic effects in plasmas. Although ""the swamp of plasma physics"" is mostly a classical place, the author indicates where quantum and classical calculations converge.

State-of-the-art review on atopic eczema, one of the most common skin diseases today. This multi-authored handbook covers all aspects relevant for physicians

from various disciplines.

The ability of cells to sense and respond to changes in oxygenation underlies a multitude of developmental, physiological, and pathological processes. This volume provides a comprehensive compendium of experimental approaches to the study of oxygen sensing in 48 chapters that are written by leaders in their fields.
