Robert Frank's Microeconomics and Behavior covers the essential topics of microeconomics while exploring the relationship between economics analysis and human behavior. The book's clear narrative appeals to students, and its numerous examples help students develop economic intuition. This book introduces modern topics not often found in intermediate textbooks. Its focus throughout is to develop a student's capacity to "think like an economist."

Frank Parker is the only thoroughly Canadianized Intermediate Microeconomics text. This, along with its stress on problem solving and developing economic thinking, sets it apart from the competition. In every chapter, students will encounter Canadian spelling, units of measurement, people, companies, places, historical examples, and applications of microeconomic principles to Canadian economic policy issues. The authors have adopted a strategy of using puzzles, humour, and arresting examples to involve students in the process of acquiring the concepts. A continuing strength of the text is that it applies game-theoretic models throughout, rather than simply in the discussion of imperfect competition. Course: Intermediate Microeconomics courses in Economics departments at both colleges and universities, 2nd and 3rd year. Also, courses in Managerial Economics and 2nd year Microeconomics courses in Business schools. Also see MBA courses with similar titles.
