New Lipid Guidelines Summary - asgprofessionals.com

New cholesterol guidelines released late last year go beyond “good” and “bad” cholesterol to individualize heart care. January 31, 2019 | By Staff Writer. For years, the American College of Cardiology (ACC) and the American Heart Association (AHA) have maintained a set of cholesterol guidelines that are used by doctors—and the public—to measure heart health.

What do the new cholesterol guidelines mean? A ...

February 4th, 2019. About one in three Americans has high cholesterol. The body needs cholesterol to function normally, but too much of this waxy, fat-like substance builds up in the arteries and may lead to serious problems like heart attack and stroke. The American College of Cardiology and the American Heart Association recently released new guidelines to help physicians and their patients take a more proactive — and personalized — approach to their cardiovascular risks.

What should I know about new cholesterol guidelines ...

Key Points for Practice • A nonfasting plasma lipid profile can be obtained to estimate ASCVD risk and document baseline LDL-C in adults 20 years and older who are not on lipid-lowering therapy. •...

Cholesterol Management: ACC/AHA Updates Guideline ...

The 2018 guideline addresses the practical management of patients with high blood cholesterol and related disorders. Recommendations are based on the best available evidence from randomized controlled trials of cholesterol-lowering therapies and other sources of evidence. This guideline is a full update of the 2013 ACC/AHA cholesterol guideline.

2018 Guideline on the Management of Blood Cholesterol ...

The guideline suggests the race- and sex-specific Pooled Cohort Equation (PCE) (ASCVD Risk Estimator Plus) to estimate 10-year ASCVD risk for asymptomatic adults aged 40-79 years. Adults should be categorized into low (<5%), borderline (5 to <7.5%), intermediate (?7.5 to <20%), or high (?20%) 10-year risk.

New European Lipid Guidelines Take Aggressive Approach

The guideline describes the critical decision points in the Management of Dyslipidemia (LIPIDS) and provides clear and comprehensive evidence based recommendations incorporating current information and practices for practitioners throughout the DoD and VA Health Care systems. The guideline is intended to improve patient outcomes and local management of patients with dyslipidemia.

VA/DoD Clinical Practice Guidelines

Since the 2013 ACC/AHA cholesterol guideline, newer cholesterol-lowering agents (nonstatin drugs) have been introduced and subjected to RCTs. They include ezetimibe and PCSK9 inhibitors, and their use is limited mainly to secondary prevention in patients at very high-risk of new atherosclerotic cardiovascular disease (ASCVD) events.

Cholesterol Guidelines | AHA/ASA Journals

Exposure to high blood cholesterol over a lifetime can increase the risk for heart attack or stroke, and new scientific guidelines say managing this waxy, fat-like substance in the blood should be a concern for all ages.
