Publisher Description

The first anonymous letter arrives on July 23rd, Victor's 13th birthday. Which is good, because it gives him something to write about in the journal his father gave him as a present. Soon Victor is writing down everything that happens as he tries to solve the mystery of the letters, conquer his fear of jumping off the high diving board at the pool, and figure out what is going on between his divorced parents. Things change when he meets D, however. A good diver and an assertive detective, she helps Victor to stop writing his life and start living it.

Computer-Integrated Building Design is an accessible guide to the principles and applications of computer-integrated systems as applied to construction management. It describes current research, development and application of CAD related tools and techniques to the building design process and demonstrates the methods necessary to achieve knowledge-sharing in building design.

The author presents an account of her sister's suicide, and the lifelong impact that the suicide has had on her own life and the lives of the other members of her family.

The American daguerreotype as something completely new: a mechanical invention that produced an image, a hybrid of fine art and science and technology. The daguerreotype, invented in France, came to America in 1839. By 1851, this early photographic method had been improved by American daguerreotypists to such a degree that it was often referred to as [the American process.] The daguerreotype[now perhaps mostly associated with stiffly posed portraits of serious-visaged nineteenth-century personages]was an extremely detailed photographic image, produced though a complicated process involving a copper plate, light-sensitive chemicals, and mercury fumes. It was, as Sarah Kate Gillespie shows in this generously illustrated history, something wholly and remarkably new: a product of science and innovative technology that resulted in a visual object. It was a hybrid, with roots in both fine art and science, and it interacted in reciprocally formative ways with fine art, science, and technology. Gillespie maps the evolution of the daguerreotype, as medium and as profession, from its introduction to the ascendancy of the [American process,] tracing its relationship to other fields and the professionalization of those fields. She does so by recounting the activities of a series of American daguerreotypists, including fine artists, scientists, and mechanical tinkers. She describes, for example, experiments undertaken by Samuel F. B. Morse as he made the transition from artist to inventor; how artists made use of the daguerreotype, both borrowing conventions from fine art and establishing new ones for a new medium; the use of the daguerreotype in various sciences, particularly astronomy; and technological innovators who drew on their work in the mechanical arts. By the 1860s, the daguerreotype had been supplanted by newer technologies. Its rise (and fall) represents an early instance of the ever-constant stream of emerging visual technologies.

An adult coloring book that feeds the soul Grab some colors, markers, or pencils in a variety of hues and let your creativity flow while you meditate on God's word. Within these pages, you'll find 24 verses from the Bible to inspire the artist in you. Author Michelle Stimpson shares some of her favorite scriptures to remind you that God loves you and He cares. Use your relaxing time with this coloring book to hide His word in your heart. Then feel free to remove the finished page to display your work or give your masterpiece to someone who needs a little encouragement.

Language learning research aims to describe and fully explain how and why language learning takes place, but can fall short of its stated purpose. Systematic, rigorous research is needed if the growing field of language learning is to progress methodically. This book demonstrates and fully explains such a methodology. Given that research in language acquisition yields practical pedagogical implications, it is crucial that it is rigorous and accurate. This book offers a quantitative research methodology that relies on statistical analysis in order to make inferences and conclusions about language learning. Experimental research aims to understand differences between or within groups of learners under manipulated environments. It requires strict control of conditions, enabling interpretations with a low factor of error. Aek Phakiti provides step-by-step guidelines and underlying principles, epistemology and methodology, in a book that is essential for advanced students of language acquisition and language and education.

John Knox, the great Reformer of Scotland, is often remembered as something akin to a biblical prophet born out of time--strong and brash, thundering in righteous might. In truth, he was "low in stature, and of a weakly constitution," a small man who was often sickly and afflicted with doubts and fears.Author Douglas Bond shows that Knox did indeed accomplish herculean tasks, but not because he was strong and resolute in himself. Rather, he was greatly used because he was submissive to God; therefore, God strengthened him. --from publisher description
