Omar Khayyam was born in 1048 in Nishapur, a leading metropolis in Khorasan during medieval times that reached its zenith of prosperity in the eleventh century under the Seljuq dynasty. Nishapur was also a major center of the Zoroastrian religion, and it is likely that Khayyam's father was a Zoroastrian who had converted to Islam.

Omar Khayyam - Wikipedia

Omar Khayyam constructed the quadrilateral shown in the figure in an effort to prove that Euclid's fifth postulate, concerning parallel lines, is superfluous. He began by constructing line segments AD and BC of equal length perpendicular to the line segment AB.
