FORMULAS FOR PERIMETER, AREA, SURFACE, VOLUME

The perimeter of a shape is the distance around the outside. It is measured in units such as centimetres, millimetres, inches, feet,

Read PDF Perimeter Area Volume Surface Area

and metres. The area of a shape is a measure of how much space there is on the surface. Area is measured in square units, written for example as cm^2 .

Teacher . . .

Surface area and volume are calculated for any three-dimensional geometrical shape. The surface area of any given object is the area or region occupied by the surface of the object.

Read PDF Perimeter Area Volume Surface Area

Whereas volume is the amount of space available in an object. In geometry, there are different shapes and sizes such as sphere, cube, cuboid, cone, cylinder, etc.
