Giambattista Vico (1668-1744) is often regarded as the beleaguered,

neglected genius of pre-Enlightenment Naples. His work-though known to Herder, Coleridge, Matthew Arnold, and Michelet-widely and deeply appreciated only during the twentieth century. Although Vico may be best known for the use

James Joyce made of his theories in *Finnegans Wake*, Croce's insightful analysis of Vico's ideas played a large role in alerting readers to his unique voice. Croce's volume preceded Joyce's creation of "Mr. John Baptist Vickar" by a quarter century.

During the last 25 years Vico's ideas about history, language, anti-Cartesian epistemology, and rhetoric have begun to receive the recognition their admirers have long claimed they deserve.

Increasing numbers of publications appear annually which bear the

stamp of Vico's thinking. Even if he is not yet so renowned as some of his contemporaries, such as Locke, Voltaire, or Montesquieu, there are good reasons to believe that in the future he will be equally honored as a cultural theorist. As a theorist of historical process and

its language, there is no more innovative voice than his until the twentieth century-which explains in part why such figures as Joyce and R.G. Collingwood freely drew on Vico's work, particularly his New Science, while creating their own. If Vico was Naples' most

brilliant, if uncelebrated, citizen prior to the Enlightenment taking hold in Southern Italy, then Croce (1866-1952) is surely the city's most important thinker of modern times, and the single indispensable Italian philosopher since Vico's death. When a genius of Croce's

interpretative prowess, evaluates the work of another, it is inevitable that an explosive mixture will result. A great virtue of this book is its fusion of Croce's unique brand of idealism and aesthetic philosophy with Vico's epistemological, ethical, and

historical theories. If Vico's theory of cyclical changes in history, the *corsi e ricorsi*, remains fruitful, it might be argued that Croce's evaluation of his countryman's ideas represented the next turn of the philosophical wheel toward enlightenment.

This book is a retrospective view of modern philosophical anthropology through the works of two of its greatest exponents. The author demonstrates how mythology, the philosophy of history and language and Vico's

concept of man had as a constant referral point Malebranche's psychology with its Cartesian formulation. The idolatrous and mythopoietic imagination that is described in *La Scienza Nuova* (New Science) has much in common with the "pagan" mind

(that is to say the mind subjugated to passions, sensitivity and fantasy that is described in *La Recherche* (The Search after Truth). Some of the themes discussed here are myth, the metaphoric nature of thought, idolatry, the formation of mentality, the relationships which

between illustrious imaginations. Moreover in Malebranche has been found a complex and complete theory of imaginative universals (universali fantastici). The philosophy of the imagination in Vico and Malebranche is translated and edited by Giorgio A. Pinton.
