Read Book Principles Trauma Therapy Evaluation

Treatment (self-soothe; regulate affect) is a primary task of treatment, and accounts for the importance of Phase I. Attempts to 'process' trauma in the absence of ability to self-regulate can precipitate overwhelm and re-traumatisation. 'Processing' of complex trauma is a Stage II task and should not be encouraged in the absence of the foundational self-regulatory work of Phase I.

...

Principles of Trauma Therapy provides a creative synthesis of cognitive-behavioral, relational/psychodynamic, and psychopharmacologic approaches to the "real world" treatment of acute and chronic posttraumatic states. Grounded in empirically-supported trauma treatment techniques, and adapted to the complexities of actual clinical practice, it is a hands-on resource for both front-line clinicians in public mental health and those in private practice.
