This volume presents a critical analysis of transatlantic relations in the field of environmental governance and climate change. The work focuses on understanding the possible trends in the evolution of global environmental governance and the prospects for breaking the current impasse on climate action. Drawing on research involving experts from eleven different universities and institutes, the authors provide innovative analyses on policy measures taken by the EU and the US, the world ' s largest economic and commercial blocs, in a number of fields, ranging from general attitudes on environmental leadership with

regard to climate change, to energy policies, new technologies for hydrocarbons extraction and carbon capture, as well as the effects of extreme weather events on climate-related political attitudes. The book examines the way in which the current attitudes of the EU and the US with regard to climate change will affect international cooperation and the building of consensus on possible climate policies, and looks to the future for international environmental governance, arguably one of the most pressing concerns of civilisation today. This book, which is based on research carried out in the context of the EU-financed FP7 research project TRANSWORLD, will appeal to academics, policy makers and practitioners seeking a deeper understanding of the challenges resulting from climate change.

This book examines the contribution of the European Commission to the process of transformation of EU borders. Migration issues have been at the centre of EU political debates in recent years. From national controversies sparked by the economic difficulties in the aftermath of the 2008 economic downturn to EU-wide problems caused by the record number of asylum seekers looking for a refuge in the Union. Simultaneously, the EU migration regime has undergone a profound change since the 1980s as a result of the developments in the integration process. Inevitably this has impacted borders, transforming their nature and functions. The author looks at four key EU policy areas, which in recent decades have substantially altered the EU migration regime: the European Neighbourhood Policy, social policy, border controls, and free movement of people. Based on a variety of Commission documents the analysis focuses on the different borders that have been transformed, their altered nature and functions, and the specific impact of the European Commission on to these processes.

How do bank supervisors strike a balance between market self-regulation and pro-active regulatory intervention? This book investigates the choice of banking supervision approach in four European Union member states from Central and Eastern Europe – Bulgaria, Estonia, Hungary, and Slovenia – after their transition to democracy and market economy.

This collection is an inside look at European Commission policy-making in education and the privatization of policy-making in the European Union. Along with contributions from leading academics in the field of educational policy and policy-sociology, this book also introduces the voices of policy consultants and policy-makers.

This study adopts a dynamic capabilities perspective to explore the activities and processes through which business model innovations arise in established organisations. New and innovative business models are fundamental to the commercialisation of the latest technologies, performance, and competitive advantage, as well as value creation for customers, the focal company and its ecosystem. Yet, our current understanding of how established companies design and implement new business models is limited by a lack of empirical research. Based on a review of relevant literature, business model innovation is presented and explored as a dynamic capability. The book subsequently uses proven methodologies to gather and analyse data from five case studies in the manufacturing, financial services, media, consulting, and healthcare industries. The framework developed here offers a novel understanding of how business model innovations come about in established organisations, a practice it dubs ‘ crafting business models in statu nascendi ’ .

The Major Developments in Tax Policy Steadily increasing globalization as well as the financial and economic crisis have brought major challenges for states in ensuring budgetary consolidation while maintaining sustainable economic growth. These developments have

not only influenced political and economic discussions in the 21st century, but also raise new questions on the role of taxation in the economic policy environment. National taxation systems worldwide are subject to significant changes and it is assumed that they will develop in a more co-operative way in the near future. This book aims at identifying the major developments in tax policy in the 21st century on a national as well as on an international level and gives an in-depth analysis of the challenges and risks, but also of the opportunities connected to these developments. It covers numerous and discrete issues ranging from challenges in the VAT/GST area, the taxation of the financial sector, the fight against aggressive tax planning, tax abuse and tax evasion, tax integration within the EU, the development of transfer pricing rules, the increasing role of co-operative compliance and good governance and the changing tax policies of developing and newly industrialized countries. The contributions in this book build upon a legal comparison of the national tax systems in the relevant fields, propose tax policy solutions where required and give ideas on how to go forward.

Social media are now established as an important aspect of contemporary education. We live in times where social media applications such as Facebook, Twitter, Tumblr and Snapchat are mainstream educational tools; where most new educational technologies claim to have a ‘ social ’ element; and it increasingly makes no sense to distinguish between learning ‘ online ’ and ‘ offline ’ . It studies users' experiences and views of social media; addresses questions of equality and diversity concerning who is doing what with social media; examines how the use of social media applications sits alongside pre-existing cultures and structures of schooling; and brings to light the unintended and unexpected results of social media in education. Altogether, this collection of writing provides a nuanced and interesting discussion of the realities of social media use across different aspects of education. This book was originally published as a special issue of Learning, Media and Technology.

Europe ’ s sovereign debt crisis and the accompanying national bank crises in the European Union brought bank regulation and supervision to the top of the EU policy agenda. In a few short years, we have witnessed a ‘ great leap forward ’ for European integration marked by over a dozen pieces of EU legislation shaping the operation of banks, rules on bank capital, reconfigured supervisory agencies, and Banking Union. The significance of these measures lies however, in the fact that they constitute the most dramatic transfer of policy-making powers to the European level since the start of Economic and Monetary Union in 1999. This volume addresses the three main political battles behind the adoption of these new regulatory and supervisory policies. First, it examines divisions among states, both according to their domestic institutional structures, including distinct financial systems, as well as their creditor or debtor status in the crisis. Second, it studies the battle over national versus supranational jurisdiction. Third, it explores the conflictual process of policy learning and the activation of epistemic communities who claim competence to address the crisis. This book was originally published as a special issue of the journal West European Politics.

“ A trenchant summation ” and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists, including US citizens (Publishers Weekly, starred review). In the long response to 9/11, the US government initiated a deeply controversial policy of “ targeted killing ” —the extrajudicial execution of suspected terrorists and militants, typically via drones. A remarkable effort was made to legitimize this practice; one that most human rights experts agree is illegal and that the United States has historically condemned. In *The Drone Memos*, civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this

program into action. In a lucid and provocative introduction, Jaffer, who led the ACLU legal team that secured the release of many of the documents, evaluates the drone memos in light of domestic and international law. He connects the documents' legal abstractions to the real-world violence they allow, and makes the case that we are trading core principles of democracy and human rights for the illusion of security. "A careful study of a secretive counterterrorism infrastructure capable of sustaining endless, orderless war, this book is profoundly necessary." —Katrina vanden Heuvel, editor and publisher of *The Nation*

This book studies the reactions by external actors, including the European Union, to the events unfolding in the Arab world beginning in December 2010. In particular, contributors look at external actors' attempts to balance their desire for stability with their normative principles toward human rights and democracy. The book compares the action (and inaction) of the EU with other international and regional players, including the United States, Russia, Turkey and Israel, and assesses the response of these actors to the Arabellions' events, analysing changes in their approaches to the Arab region. The contributions to this book answer three questions: (1) How have external actors assessed the 'Arabellions' and what role did they see for themselves in this context? (2) Which goals and instruments did external actors pursue toward the MENA region? In particular, how did they deal with conflicting goals, such as support for human rights and democracy, on the one hand, and concerns about security and stability, on the other? (3) How can we explain the varying responses of external actors to the Arabellions? This book was published as a special issue of the *Journal of European Integration*.
