(PDF) Remittances and Development in Latin America Mar 20 2020. Family remittances to Latin America and the Caribbean grew by approximately eight percent in 2019 compared to 2018. This marks a slowing trend in remittance growth that began in 2017. The slowing growth is associated with remittances to Mexico having decelerated from 11.2 percent to 7 percent as well

Remittances and Development:
Lessons from Latin America

First, no matter how authors look at the issue, remittances are extremely important in the Latin American context. With remittances estimated to have topped more than US\$50 billion in 2006, Latin America is now the main destination of these flows. Second, remittances generate a number of important positive contributions to economic development.

Abstract. International private transfers from immigrant workers to families and friends have surged in Latin America. These transfers, also known as remittances, grew from a mere US\$5 billion in 1990 to US\$74.3 billion in 2016, supplementing the income of millions of families in the region. Particularly, remittances can contribute to human development by lifting large populations out of extreme poverty and by enabling better housing, education, and health.
