Right From The Start

Right from the Start is a legislative and budget campaign to advance state policies for young children and their families in Rhode Island. During the COVID-19 crisis, it has become even more clear that policies and programs that help families with young children are essential for a strong economy and public health. Investments now will help our state and Rhode Island's young children and families weather this crisis and emerge stronger on the other side.

Become an Expert Investor in Stocks and Secure Your Financial Future! Do you want to generate a steady passive income that will secure your retirement days? Are you thinking about investing in stocks, but are worried you'll lose your money? This book will transform you from a beginner in stock investing in a stock market expert! Investing in stocks is probably one of the fastest ways to earn a lot of money. Or lose it. Many have tried their luck on the market. Some were incredibly successful, but some failed to secure their financial future. You're probably thinking that the first group was just lucky. While luck does play a small part in the stock market, the main reason why some succeed is that they mastered intelligent investment. They know how to recognize bad stock, or jump in early on promising stocks. They take certain risks, but stay away from highly risky stocks, no matter the rewards. Now you can be one of them, and learn all those things and more! This book will guide you every step of the way on your journey to fortune and success! Here's what you'll learn: The stock market terminology, to understand what you're dealing with The difference between a stock and a share How exactly the stock market works How to start trading in stocks How to recognize healthy stocks, and which stocks should you avoid

Guides readers on the path to financial freedom, discussing how to not only weather but gain from fluctuations in the stock market, how to get more out of a 401k, and how to avoid paying hidden fees.

In this book, self-made millionaire Phil Towns will show you how he turned \$1,000 into \$1 million in only five years, and then proceeded to make many millions more. Before I became Phil Town, teacher of investing principles to more than 500,000 people a year, I was a lot like you: someone who viewed individual stock investing as way too hard to do successfully. As a guy who barely made a living as a river guide, I considered the whole process pretty impenetrable, and I was convinced that to do it right you had to make it a full-time job. Me, I was more interested in having full-time fun. So I was tempted to do what you're probably doing right now: letting some mutual fund manager worry about growing your nest egg. Let me tell you why that decision could one day make you absolutely miserable. The fact is, because of natural market cycles, the mutual fund industry is likely to soon be facing twenty years of flat returns. That means that if

you've got your nest egg tucked away in funds—especially the type found in most 401ks—your egg won't get much bigger than it is now. Translation: Get ready for a retirement filled with lots of cold cuts, plenty of quality TV-watching time, and a place to live that's too small to accommodate your visiting kids. I came to investing as a person who wasn't great at math, possessed zero extra cash, and wanted a life—not an extra three hours of work to do every day. Fortunately, I was introduced to *The Rule*. Rule #1, as famed investor Warren Buffett will tell you, is don't lose money. Through an intriguing process that I'll clarify in this book, not losing money results in making more money than you ever imagined. What it comes down to is buying shares of companies only when the numbers—and the intangibles—are on your side. If that sounds too good to be true, it's because the mind-set I'll be introducing you to leads not to bets but to certainties. Believe me, if there were anything genius-level about this, I'd still be a river guide collecting unemployment much of the year. Part of the secret is thinking of yourself as a business owner rather than a stock investor. Part is taking advantage of today's new Internet tools, which drastically reduce the "homework factor." (We're talking a few minutes, tops.) Part is knowing the only five numbers that really count in valuing a potential investment. And part—maybe the most important part—is using the risk-free Rule #1 approach to consistently pay a mere 50 cents to buy a dollar's worth of a business. What I won't waste your time with is fluff: a lot of vague parables reminding you of what you already know and leaving you exactly where you started. This is the real deal, folks: a start-to-finish, one-baby-step-at-a-time approach that will allow you to retire ten years sooner than you planned, with more creature comforts than you ever imagined.

CEO of one of the most respected mutual fund companies in the world, The Vanguard Group, Jack Brennan has made a career out of helping people invest for long-term success. In *Straight Talk on Investing*, he cuts to the chase and provides readers with sound advice and solid guidance to investing for today and tomorrow, in a bull market or bear market. Starting with a clear explanation of the financial facts of life, Brennan explains that investing is a lot easier than most people think. He shows readers how to develop a financial plan, construct and manage a sensible investment program, and maintain perspective in a sometimes crazy world. Refreshing in its simplicity and honesty, *Straight Talk on Investing* is a badly needed tonic to the hangover of the bull market of the 1990s. Filled with meaningful guidance for investors from a leading investment luminary, this invaluable resource will help readers make better investment decisions and restore financial faith in themselves, so they can confidently navigate the markets toward their financial goals. Jack Brennan (Wayne, PA) is the Chairman and CEO of The Vanguard Group, the world's second-largest mutual fund company, with \$600 billion in assets under management and 15 million shareholder accounts. Mr. Brennan is a frequent guest on financial news programs and is regularly quoted in leading business and personal finance publications, including *The Wall Street Journal* and *The New York Times*. In 2000 and 2001, *SmartMoney* ranked him as one of the most influential individuals in investing. Marta McCave (Wayne, PA) is a senior financial writer for The Vanguard Group and a former journalist. She was a founding member of the national reporting staff of *USA Today* and was a contributor to a number of newspapers and magazines before joining Vanguard.

your beginner's guide to long lasting success in the market, packed full with information and steps to reproduce and to get you to start investing money the right way. With the ups and downs in the market, it was never more important to know what it really takes to be a successful investor. This book is made for 2017 with updated information on what really counts in today's market.

Don't get mad, get even! Phil Town's first book, the #1 New York Times bestseller *Rule #1*, was a guide to stock trading for people who believe they lack the knowledge to trade. But because many people aren't ready to go from mutual funds directly into trading without understanding investing—for the long term—he created *Payback Time*. Too often, people see long-term investing as “mutual fund contributing” — otherwise known as “long-term hoping.” But the sad truth is that mutual fund investors are, to a stunning degree, pinning their hopes on an institution that is hopeless. It turns out that only 4% of fund managers consistently beat the S&P 500 index over the long term, which means that 96% of fund investors see a smaller return on their nest egg than a chimpanzee who simply buys stocks in the 500 biggest companies in America and watches what happens. But it's worse than that. The net effect of hitching your wagon to mutual funds is that over a lifetime they'll fritter away as much 60% of your nest egg in fees. Once you understand how funds engineer this, you'll rush to invest on your own. *Payback Time*'s risk-free approach is called “stockpiling” and it's how billionaires get rich in bad markets. It's a set of rules for investing (not trading but investing) in the right businesses at the right time -- rules that will ensure you make the big money.
