When the rand collapsed from 7.60 to 13.84 to the US dollar

Get Free Sasol Wax In

in 2001, Kevin Wakeford blew the whistle, accusing three big corporates and one global bank of being party to manipulation in the currency markets. Wakeford predicted that the rand was on its way to 20, 30, 40 and possibly 50 to the dollar, which would have thrown the seven-year-old democracy into economic and political turmoil. As a result of his intervention, a Rand Commission was set up by President Mbeki to investigate his claims, and the rand ' s collapse was arrested and reversed. The Rand Commission was, however, shut down prematurely and Wakeford was fired as CEO of the South African Chamber of Business. While the Enron and WorldCom scandals in the United States triggered comprehensive corporate reform, it seemed that South African authorities were determined to cover up any wrongdoing. In *The Assault on the Rand*, Barry Sergeant tells the explosive story of the rand ' s collapse and the events that followed. He also explores more recent banking scandals around the world, giving a hard-hitting exposé of greed, collusion and manipulation in the markets.

This book identifies the next generation chemical additives for eight selected industries. The text also provides methods for their preparation, additive treatment levels, and testing methods to evaluate additive performance.--

Worldwide there is a growing interest in efficient planning and the design, construction and maintenance of transportation facilities and infrastructure assets. The 3rd International Conference on Transportation Infrastructure ICTI 2014 (Pisa, April 22-25, 2014) contains contributions on sustainable development and preservation of transportation in

This work presents the results of RILEM TC 237-SIB (Testing and characterization of sustainable innovative bituminous materials and systems). The papers have been selected for publication after a rigorous peer review process and will be an invaluable source to outline and clarify the main directions of present and future research and standardization for bituminous materials and pavements. The following topics are covered: - Characterization of binder-aggregate interaction - Innovative testing of bituminous binders, additives and modifiers - Durability and aging of asphalt pavements - Mixture design and compaction analysis - Environmentally sustainable materials and technologies - Advances in laboratory characterization of bituminous materials - Modeling of road materials and pavement performance prediction - Field measurement and in-situ characterization - Innovative materials for reinforcement and interlayer systems - Cracking and damage characterization of asphalt pavements - Recycling and re-use in road pavements This is the proceedings of the RILEM SIB2015 Symposium (Ancona, Italy, October 7-9, 2015).
