Smiley Shark Sharks
Sharks are a group of elasmobranch fish characterized by a cartilaginous skeleton, five to seven gill slits on the sides of the head, and pectoral fins that are not fused to the head. Modern sharks are classified within the clade Selachimorpha (or Selachii) and are the sister group to the rays.

Shark - Wikipedia
Sharks, together with rays and skates, make up the subclass Elasmobranchii of the Chondrichthyes. Sharks differ from other elasmobranchs, however, and resemble ordinary fishes, in the fusiform shape of their body and in the location of their gill clefts on each side of the head.

shark | Attacks, Types, & Facts | Britannica

Sharks, explained - Animals
Sharks and rays are some of the most enigmatic and misunderstood creatures of the ocean. They are crucial for the health of our planet. This blog describes five incredible ways in which sharks and rays help the world, from fighting climate change to digging through sand for their neighbors to feeding phytoplankton.

Shark | Species | WWF
From basking sharks to blue sharks and even Greenland sharks. The basking shark is Britain ' s largest fish (and the second largest in the world). It can grow up to 11 metres long and weigh up to 7 tonnes - about the size and weight of a double-decker bus. © Simon Lorenz / WWF-Hong Kong

Top 10 facts about sharks | WWF
Sharks are carnivores, and they primarily hunt and eat fish, sea mammals like dolphins and seals, and other sharks. Some species prefer or include turtles and seagulls, crustaceans and mollusks, and plankton and krill in their diets. Sharks have a lateral line system along their sides which detects water movements.

As well as the 21 resident sharks, there are at least 11 deepwater shark species. Including the Portuguese Dogfish, Black Dogfish, Kitefin Shark and Gulper Shark. Sadly, scientists consider over 50% of British sharks to be Threatened or Near Threatened. This includes the once common Angelshark, which is now rarely encountered.

British Sharks | The Shark Trust
Every shark belongs to the classification Chondrichthyes which identifies them as cartilaginous fish, fish whose internal skeletons are comprised of flexible cartilage rather than bone. Chondrichthyes consists of two groups, Holocephali and Elasmobranchii, and within Elasmobranchii are eight (8) orders of sharks.

Shark Species — Shark Research Institute
Sharks are a large group of fish that have inhabited the oceans for over 400 million years, even before dinosaurs populated our planet. They belong to the superorder Selachimorpha, and modern sharks have specific characteristics like a cartilaginous skeleton, five or six pairs of gills and several rows of teeth.

Every volume of Science Comics is a complete introduction to a particular topic--dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you!This volume: In Sharks, we explore one of the most unfairly villainized and Hollywood-famous underwater predators. With their 400-million year history, their vital role in maintaining the ecosystem, their incredible specialized adaptations, and their various unique species, there is a lot more to sharks than just their ferocious jaws.

Learn about sharks with everyone's favorite Cat in the Hat! The Cat in the Hat dives deep in this fascinating exploration of the world of sharks. Learn about the different types of sharks, how we study them, and why they aren't so scary after all. Perfect for kids who love sharks and Dr. Seuss alike, and for any kid who loves learning and science. The Cat in the Hat's Learning Library is a nonfiction, unjacketed hardcover series that introduces beginning readers ages 5-8 to important basic concepts. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library titles explore a range of topics about the world we live in and include an index, glossary, and suggestions for further reading. " Pretty much all the stuff you need to know is in Dr. Seuss. " --President Barack Obama

"A nonfiction picture book tracing the repercussions of what would happen if sharks disappeared from our planet"--

The speaker in this extraordinary collection finds herself multiply dislocated: from her childhood in California, from her family ' s roots in Mexico, from a dying parent, from her prior self. The world is always in motion -- both toward and away from us--and it is also full of risk: from sharks unexpectedly lurking beneath estuarial rivers to the dangers of New York City, where, as Limón reminds us, even rats find themselves trapped by the garbage cans they ' ve crawled into. In such a world, how should one proceed? ThroughoutSharks in the Rivers, Limón suggests that we must cleave to the world as it "keep[s] opening before us, " for, if we pay attention, we can be one with its complex, ephemeral, and beautiful strangeness. Loss is perpetual, and each person ' s mouth "is the same / mouth as everyone ' s, all trying to say the same thing. " For Limón, it ' s the saying--individual and collective -- that transforms each of us into "a wound overcome by wonder, " that allows "the wind itself " to be our "own wild whisper. "

Caldecott Honor–winning team Steve Jenkins and Robin Page explore the astonishing lives of sharks in this brilliantly illustrated picture book. Perfect for Shark Week and all year round, this ode to the notorious ocean predator with more than four hundred species will blow you out of the water! Sharp teeth, super senses, and those infamous fins—what's not to love about sharks? Caldecott Honor–winning team Steve Jenkins and Robin Page explore one of the world's most notorious—and fearsome—animals. Learn what makes a shark a shark, what sharks like to eat, and how these predators of the deep have evolved. Ever wonder which shark is the smallest? Or the fastest? Even the most deadly? You'll find your answers in The Shark Book, with countless others. In this magnificently illustrated picture book, celebrate one of the worlds oldest species that has continued to capture our imaginations and astonish us for thousands of years.

Introduces beginning readers to a variety of shark species from the dwarf lantern and the whale shark to the great white and the goblin, sharing numerous facts about their characteristics and behaviors.
