Keeping in pace with the changing accounting practices, this revised edition of Advanced Accounts - Volume II provides a contemporary and comprehensive presentation of accounting concepts and applications.

This comprehensive edition is the most authoritative text on advanced accounting topics. The book continues its legacy and provides a contemporary and comprehensive presentation of a wide spectrum of accounting concepts and applications. Detailed fundamentals provide a natural grounding and help in gaining accounting skills and knowledge. The book offers a structural presentation with over 500 clear illustrations, extensive exercise questions and updated accounting treatments. The book could be used to great advantage by accounting professionals

This book, in its Second Edition, provides the basic concepts and applications of discrete mathematics and graph theory. The book is aimed at undergraduate students of computer science and engineering, and information technology. It is also suitable for undergraduate and postgraduate students of computer science, mathematics and computer applications. The book exposes the students to fundamental knowledge in: - Mathematical logic, tautology and normal forms - Elementary set theory, functions and their relations - Algebraic structure, binary operation, group theory and homomorphism - Theory of permutations and combinations, binomial and multinomial theorems - Recurrence relations and methods of solving them - Graph theory, spanning tree, Eulerian and Hamiltonian circuits and isomorphism Key Features Includes a large number of worked-out problems for sound understanding of the concepts. Offers chapter-end exercises to test students' comprehension of theory. Gives a quiz section at the end of each chapter to help students prepare for the competitive examinations. Incorporates short questions asked in universities' examinations.

ACCA Approved and valid for exams from June 2017 up to 31 March 2018 - Becker's Study Text has been approved and quality assured by the ACCA's examining team. This edition covers the 2016 Finance Act. It includes: An introductory session containing the Syllabus and Study Guide and approach to examining the syllabus to familiarise you with the content of this paper, comprehensive coverage of the entire syllabus, focus on learning outcomes, visual overviews, illustrations and exhibits, examples with solutions, definition of terms, exam advice and key points, commentaries, session summaries, end-of-session quizzes and a bank of questions (containing question practice for every topic, model answers and workings and tutorial notes).

Between 2012 and 2013, Mali has gone through the most challenging period of its history as a nation-state. From a praised democracy, the country almost collapsed after the onset of a complex set of rebellions that threatened to divide or completely erase it from the map. This book provides a three-dimensional analysis of the conflict drivers as well a deep assessment of the conflict resolution mechanisms that were set up to restore Mali control over its territory. From the outbreak of MNLA insurgent attacks in early 2012, the crafting of AZAWAD,the fluidity of MNLA alliance with ANSAR DINE, MUJAO and AQIM, the coup d'état of Sanogo and downfall of Amani Toumani Touré, the responses of ECOWAS, the 'core countries' (Algeria, Mauritania), the African Union, the role of France to the re-hatting of AFISMA and launch of MINUSMA, all crusty details and facets of the crisis are meticulously scrutinized. This book is a must-have for academics, diplomats and strategists interested the new conflict dynamics in Mali and West Africa in a global era.

A personal and culture-driven exploration of the most pressing questions facing the transgender community today, from a leading activist, musician, and academic In Trans Like Me, CN Lester takes readers on a measured, thoughtful, intelligent yet approachable tour through the most important and high-profile narratives around the trans community, turning them inside out and examining where we really are in terms of progress. From the impact of the media's wording in covering trans people and issues, to the way parenting gender variant children is portrayed, Lester brings their charged personal narrative to every topic and expertly lays out the work left to be done. Trans Like Me explores the ways that we are all defined by ideas of gender--whether we live as he, she, or they--and how we can strive for authenticity in a world that forces limiting labels.

Contents in this full color digital edition: Patric Marsolek: Lost Tribes The Enduring Search for the Missing Heirs of the Biblical Jacob William B. Stoecker: MORPHIC FIELDS AND DNA Why Life on Earth Is Not Explained by Genetics Alone Cynthia Logan: CHALLENGING THE ILLUSION OF DEATH A Game-Changing Conversation with Top Biologist Robert Lanza D.W. Kreger: PATHOLOGICAL SKEPTICISM A Leading Psychiatrist on Why Some Minds Never Open Susan B. Martinez, Ph.D.: A QUESTION OF BREEDING Darwinian Confusion and the Fossil Record

The book has all the assessment tools like assessment exercise, short questions with answers, fill in the blanks and multiple choice questions (MCQ).

This book chronicles the story of the United Nations under Secretary-General Ban Ki-moon in the decade 2007–2016. Marcel Jesenský provides a compelling account of the organization's activities and Ban Ki-moon's role in reconciling the aims, principles and prerogatives of his office, the organization and its Charter with the demands, interests and power of the member states. Today, as never before, the concept of the post-World War II multilateral framework of international relations tries to harmonize the claims for its reform and re-evaluation with growing demands to manage the globalized world. This work, invaluable for readers interested in global governance, multilateral diplomacy, the United Nations and international relations, presents its subject in historical context and provides answers to assist its understanding.
