best address spiritual assessment and care. Spirituality, the search for meaning in life and connection to others, remains relevant to all patient interactions, and an essential component for nurses to integrate into their everyday practice. Using a multicultural and client-centered approach, chapters explore the concept of spirituality, and its relationship with religion and health to directly place spirituality in a nursing context. Reflection questions interspersed throughout encourage the reader to analyze their own experiences with spirituality within both professional and personal

dimension of palliative care, uniformity of spiritual care practice has been lacking across health care settings due to factors like varying understandings and definitions of spirituality, lack of resources and practical tools, and limited professional education and training in spiritual care. In order to address these shortcomings, more than forty spiritual and palliative care experts gathered for a national conference to discuss guidelines for incorporating spirituality into palliative care. Their consensus findings form the basis of Making Health Care Whole. This important new
